Copytalk Launches Audio And Video Transcription Services

September 10, 2015

September 10, 2015 - PRESSADVANTAGE -
Copytalk, a business based in Sarasota, FL, is proud to announce that they have launched new audio and video transcription services. The advantage is that when businesses outsource their transcription requirements, they are freeing up time to focus on their own core business issues. The transcription services cam also be time stamped with speaker identification if the client prefers.

Maree Moscati from Copytalk says: "We provide fully secure, high quality transcription services. We are fast, completing transcriptions withing 72 hours, and most of all accurate. Our transcriptions are completed in private facilities so that we can ensure confidentiality and security is maintained at all times."

Businesses frequently record what is being said during meetings and conferences, particularly if there is a requirement for verbatim documentation, something that even the best stenographers struggle to achieve. Transcribing these conversations after the meeting, however, is a very time consuming effort.

Additionally, businesses are starting to see the benefits of outsourcing certain elements of their work to specialized service providers. While most businesses do have a number administration workers who would

be able to complete transcriptions, these often have a huge amount of other work as well, which means they would have to either wait to complete the transcription, or leave other work behind.

Copytalk enables businesses to allow their admin workers to focus on their specific jobs, while also ensuring that their transcriptions are completed quickly, accurately and confidentially. Those who have already used the service have been very happy with the work that has been completed for them. "Copytalk is like having a mobile assistant," says Rob, CLU, ChFC, REBC and Trustee Liaison of the NAIFA Member Benefits Committee. "Newer people in the industry who don't have an assistant can use Copytalk, and for more seasoned professionals, it frees up their current staff and allows them to be more productive."

Transcribing video to text is a complex piece of work that requires high levels of accuracy. Copytalk is confident about their ability to complete this work. Their video and audio transcription services include speaker identification, which means customers can be confident in the knowledge that the right statements are attributed to the right people.
