

Red Rock Flooring Expands Flooring and Dust-Free Removal Services Across Three States

September 25, 2026

ST. GEORGE, UT - September 25, 2026 -
Red Rock Flooring, a flooring contractor based in Southern Utah, is serving homeowners, businesses, contractors, and property owners across a three-state region that spans Southern Utah, Arizona, and Nevada. The company continues to provide flooring sales, installation, demolition, and dust-free tile removal to residential and commercial clients throughout the area.

The expanded regional footprint reflects growing demand for professional flooring work across the desert Southwest, where new construction, rental turnovers, and remodeling projects continue at a steady pace. Red Rock Flooring holds licensing and insurance in Utah, Arizona, and Nevada, allowing it to coordinate projects that cross state lines while maintaining a local presence in each community it serves.

The company offers a broad range of flooring products, including hardwood, engineered hardwood, tile, laminate, luxury vinyl plank, and carpet, along with custom area rugs. In addition to sales and installation, services include dustless demolition, floor removal, concrete coating, and bathroom remodeling support. The

dust-free removal process is designed to limit debris and protect the remainder of a home or business during renovation.

Kevin Tatom, owner of Red Rock Flooring, said the three-state service area allows the company to support a wide range of clients without losing its regional focus.

"Flooring needs across the Southwest vary widely, from a single rental unit to a full commercial tenant improvement," Tatom said. "Serving Utah, Arizona, and Nevada lets the team apply the same standards and material knowledge across every project, regardless of where it takes place."

Dust-free tile removal has become an area of particular interest for property owners concerned about the mess associated with traditional demolition. The process captures debris during removal, reducing cleanup and helping keep dust out of living and working spaces. The company applies this approach to tile removal, floor removal, and larger demolition work.

Commercial clients make up a meaningful portion of the company's work. Red Rock Flooring handles product selection, demolition, installation, and project coordination for businesses undergoing renovation, replacement, or tenant improvements. Residential services cover both established homes and new builds, with practical guidance offered to help clients choose materials suited to their spaces and budgets.

"Concrete coatings and durable flooring options have grown in demand as owners look for surfaces that hold up in the regional climate," Tatom said. "The goal is to match each client with materials that fit how a space is actually used."

Red Rock Flooring in St. George also provides in-house design services for both installation and do-it-yourself customers, along with in-house financing upon approval. The company has maintained a commitment to giving back to wounded veterans within its community.

Red Rock Flooring is a flooring contractor headquartered in St. George, Utah, serving Southern Utah, Arizona, and Nevada.
