

# Comfort Professor Named Approved Ductless Contractor in the Ductless Directory

*October 05, 2026*

WILMINGTON, MA - October 05, 2026 -
Comfort Professor has been selected as a qualified, vetted and approved ductless heat pump contractor for inclusion in the Ductless Directory, an online resource that helps homeowners identify capable installers of ductless heating and cooling systems. The selection recognizes the company for its evaluation process, professional installation practices and commitment to homeowner education.

The Ductless Directory reviews and approves installers based on their technical qualifications, installation standards and customer service record. The listing identifies Comfort Professor as a Ductless HVAC Contractor in Wilmington Massachusetts serving Greater Boston, the North Shore, MetroWest and surrounding communities.

Contractor selection has become an increasingly important consideration for homeowners weighing a switch to ductless heat pumps. Industry research indicates that improper installation can reduce the efficiency of a ductless heating and cooling system by as much as 30 percent. Factors such as home evaluation, system

sizing, equipment placement and installation quality often determine whether a system delivers the comfort and efficiency homeowners expect.

Ductless systems perform differently from one home to the next because room layout, insulation levels and heating and cooling requirements vary. A qualified contractor evaluates these conditions before recommending a system rather than applying a single standard solution. Matching the appropriate equipment to the home and completing a careful installation are central to long-term performance.

Derek Vacca, Owner of Comfort Professor, said the recognition reflects an education-first philosophy that guides the company. "The team explains the problem, reviews the available options and helps each homeowner understand the solution before any work begins. Every installation is customized, which means matching the right equipment to the home and completing the installation to professional standards so the system delivers the comfort a family is counting on."

Vacca also noted a common misunderstanding among homeowners beginning the process. "A frequent mistake is shopping primarily by brand or price rather than focusing on who installs the system. The contractor makes the difference in how a ductless heat pump actually performs over its lifetime, and that is why the vetting behind this directory matters to the homeowners who use it."

Comfort Professor holds credentials that include Mitsubishi Electric Elite Diamond Contractor status and recognition as a Mass Save heat pump installer. The company operates with a 100 percent satisfaction guarantee and provides after-hours emergency service. As a Mass Save approved contractor, the company also assists homeowners in qualifying for available rebates and offers financing on qualifying projects.

An overview of the company and its approach to ductless installation is available in a video produced for the Ductless Directory on YouTube.

Comfort Professor is a home comfort company based in Wilmington, Massachusetts, specializing in ductless mini split installation along with heating, cooling, plumbing, water filtration and generator services. The company serves Greater Boston, the North Shore, MetroWest and surrounding Massachusetts communities with an education-first approach and a focus on customized solutions for each home.
