

Modern Sprout Unveils 2026 Holiday Gift Guide for Gardeners and Plant Lovers

October 19, 2026

Chicago, Illinois - October 19, 2026 -
Modern Sprout has released its 2026 Holiday Gift Guide, a curated selection of gifts for gardeners and gifts for plant lovers spanning a wide range of recipients and price points. The guide organizes recommendations by the type of person on a shopper's list, with options suited to indoor plant enthusiasts, outdoor gardeners, home cooks, bird lovers, cat lovers, and those seeking stocking stuffers under twenty-five dollars.

For indoor plant lovers, Modern Sprout highlights its Garden Jars organic herb kits, available from twenty dollars, and the Smart Growbar, priced at ninety-nine dollars. Both options are designed to bring greenery indoors regardless of available natural light.

For outdoor gardeners, the guide features Gardening Shears and Pruners from nineteen dollars and ninety-nine cents, along with the Hori Hori Garden Gift Box at seventy-four dollars and ninety-nine cents. These selections focus on practical tools for those who tend beds and borders through the growing season.

For cooks, the guide again points to the Garden Jars organic herb kits from twenty dollars, offering fresh herbs within reach of the kitchen. The category also includes Produce Keepers at eleven dollars and ninety-nine cents, intended to help extend the life of fresh ingredients.

For bird lovers, Modern Sprout recommends the Birds on the Block Window Birdfeeder at seventeen dollars and ninety-nine cents, which allows close observation of visiting birds from indoors.

For cat lovers, the guide suggests the New Pet Tiny Terracotta Grow Kits at fourteen dollars and ninety-nine cents, a selection that includes a catnip option for feline companions.

For shoppers seeking gifts under twenty-five dollars and stocking stuffers, the guide includes Holiday Seed Pops from six dollars and ninety-nine cents, Glow and Grow Kits at twenty-four dollars, and Rooted Candles from nineteen dollars and ninety-nine cents. The Rooted Candles are designed to be transformed into grow kits or planters once the candle has finished burning.

"The guide is organized around people rather than products, because gift givers tend to shop with a specific recipient in mind," said Nick Behr, spokesperson for Modern Sprout. "Sorting the selections by recipient and by price point makes it simpler to find something appropriate, whether someone is shopping for a seasoned gardener or a first-time plant parent."

Behr noted that the range reflects the company's broader focus on accessible gardening. "Each item is meant to make growing something feel approachable," he said. "From a seed pop to a smart grow system, the goal is to help more people bring plants into their homes and routines."

Modern Sprout offers products and services related to indoor and outdoor gardening, including grow kits, gardening seed kits, indoor plant care products, gardening accessories, grow lights, candles, and live plants. The company also provides gift sets, bundles, and corporate gifts suited to a variety of occasions and recipients. Modern Sprout maintains a commitment to sustainability and offers a range of eco-friendly products designed to make gardening accessible for both beginners and experienced growers.
