"My biggest asset is my reputation." - Richard Branson

"Reputation, Reviews, Testimonials, Word of Mouth, it all means the same in today's Digital world. So Google reviews, Yelp reviews, etc., is the way our society today makes buying decisions. We easily browse through various online channels to see who is the best provider of the service or product we are looking for. It's this new way to create online word of mouth through reviews and testimonials that elevates one's reputation landing more traffic and sales," said Diego Valencia.

More details about these services, perhaps including pricing tiers, available upgrades, any special offers etc., are to be announced on a near future date through press releases, their YouTube / Facebook Channels, and or Website. SoCal Marketing Consultants' Reputation Marketing and Reputation Repair Services is part of a 1/2 off launch series that will begin sometime in July 2016.
