

CafeTech Systems Forms Joint Venture with SafetyNet Financial Group LLC

July 14, 2016

July 14, 2016 - PRESSADVANTAGE - Minneapolis, MN July 14th, 2016

SafetyNet Financial Group LLC www.safetynetfg.com, an insurance agency with operations in Minnesota and Florida catering to the business owner market, recently entered into a joint venture with CafeTech Systems, an IT firm that provides restaurant owners with online ordering solutions. The two firms plan to offer a valuable cost savings and recovery program for restaurant owners. The purpose of the joint venture is to help CafeTech?s restaurant owner clients to reduce and recover expenditures and improve cash flow with no upfront cost to the restaurant owner.

The agreement, brokered by Addam Brown, a Certified Joint Venture Broker with Quantum Marketing Systems, gives CafeTech?s clients the ability to save on their core business expenses. ?SafetyNet provides a complimentary assessment of services the restaurant currently uses in order to find opportunities to reduce and recover savings,? said Addam Brown. Reid Bollinger, CEO of CafeTech Systems said of the joint venture ?I think the SafetyNet Savings Solution is a great way for us to add value to our clients and an opportunity that over 90% of our clients can benefit from!?

Catering to the needs of the business owner for over 14 years, SafetyNet Financial Group LLC introduced the

Savings Solution to help business owners improve cash flow, eliminate risks, and plan for business

succession. According to Addam Brown, an initial Savings Solution analysis can save the average client 21%

on the over 1000 charges that can potentially make up a merchant services fee. In addition, he noted that

they find savings nearly 100% of the time and a typical business can start to see savings as soon as 30 days.

According to Mr. Brown, when it comes to commercial businesses nearly 90% can save an average of

\$3,000-\$15,000 in as little as 60 days of doing a Waste/Recycling Audit. One of the biggest areas that Mr.

Brown identified for savings is workman's compensation because 70% of all companies have been, or, are

currently overcharged for workman?s compensation. There are many areas that can result in savings and

even recovery of past expenses.

Restaurant owners can find out more about the how the savings program can help their restaurant by

contacting CafeTech Systems on their website www.cafetech.net.
