Dr. Robert A. Hardesty Named 2015 Top Cosmetic Plastic Surgeon In The Inland Empire California

June 01, 2015

June 01, 2015 - PRESSADVANTAGE -

Dr. Robert A. Hardesty, Medical Director of Imagine Plastic Surgery in Riverside, CA named 2015 Readers Choice Award Recipient for Inland Empire, California.

Dr. Robert A. Hardesty, MD FACS is well known by patients to be ethical, compassionate and caring. Patients travel from all over California to seek his care and advice. As one of his many pleased patients stated, ?Dr. Hardesty is MAGICAL. I feel so much better about myself thanks to this amazing surgeon.?

The delivery of personal and individualized total patient care has been the hallmark of Dr. Hardesty?s success. With 30 years in plastic surgical experience, Robert A. Hardesty, M.D. has established an outstanding reputation for excellence in plastic surgery. However, even with his time-proven surgical and artistic skills as a Board Certified Plastic Surgeon, the approach Dr. Hardesty has created at his Imagine Plastic Surgery center is that surgery is not always the best and most effective option for reaching one's aesthetic goal.

"Our motto in our practice is, ?One Goal, Many Options,? Dr. Hardesty stated, ?and for that reason our center is uniquely set up to offer the full spectrum of both non-surgical and surgical options. As an example,? he continued, ?we have the first non-surgical clinically proven UltraShape body contouring technology in the Inland Empire. With no pain, no down time, and no recovery time, our patients are losing 1-3 inches off their waist size after finishing their treatment protocol. "

Imagine Plastic Surgery has the largest collection of cosmetic treatment devices in the Inland Empire of any physician?s practice, including:

1) Lasers (hair removal, scar reduction, skin resurfacing and vascular obliteration)
2) Radio Frequency Devices (body/face skin shrinkage fat reduction, and resurfacing)
3) Ultrasonic Non-Surgical Body Contouring (UltraShape fat reduction by destruction of fat cells)
4) Intense Pulsed Light (skin pigment removal)

"We use the term Synergy, when we uniquely combine state of the art short incision/minimally invasive surgical techniques, with the latest non-surgical technologies," says Dr. Hardesty. "This enables us to achieve improvement in results that cannot be achieved with surgery alone." Breast augmentation, breast lift, tummy tuck, mommy makeovers, and facelifts, along with liposuction and body contouring, are among the popular procedures performed for patients by Dr. Hardesty at Imagine Plastic Surgery center.

Based on his excellent credentials, 5-Star patient reviews, extensive experience, and artistic skill in plastic surgery, it can be summed up that when choosing Dr. Hardesty for a cosmetic procedure you can readily Imagine the Difference!

Dr. Robert A. Hardesty: Experience and Accomplishments

Dr. Hardesty is Double Board Certified in both Plastic and General Surgery.

By a vote of his peers, he has been listed by U.S. News & World Report?s in Castle Connolly?s Top Doctors in America: Plastic Surgery & Cosmetic Surgery and Best Doctors in America from 1996 to present.

Recipient of the ?Patients? Choice? award given in appreciation and praise for his quality care. (Of the nation?s 870,000 active doctors, only 5% were awarded this honor by their patients). In 2010 U.S. News and World Report magazine (which rates colleges, hospitals etc.) began recognizing ?Top Doctors? and Dr.

Hardesty has been not only voted the Top Doctor award but in addition given the highest distinctions of achieving the top 1% of all physicians based on: medical education, training, certification, license, hospital appointments, professional achievements, patient satisfaction and administrative posts.

May 2013 Dr. Hardesty became the President of the California Society of Plastic Surgeons, the largest regional society of Plastic Surgeons in the United States.

Dr. Hardesty donates his time regularly to international medical projects and has provided care, without charge, to those individuals with congenital or acquired deformities. He has traveled to Africa, Argentina, India, Mexico, Nepal, Vietnam, and the Philippines. While at Loma Linda University, Dr. Hardesty founded ?Operation Good Samaritan? which continues to provide surgical care and education the less fortunate children in developing countries.

Dr. Hardesty?s proudest accomplishments and blessings, however, are his marriage of over 25 years to Marti Baum-Hardesty, M.D. and their four children: Ashlee, Bradford, Chelsea and Derik.
