

Individual Pension by Design Now Available At The Diamond Group's New Forest Lake Office

August 01, 2016

August 01, 2016 - PRESSADVANTAGE -

The Diamond Group, a retirement consulting business, is proud to announce the grand opening of the company's new office in Forest Lake, MN. Alan Schmidt, the founder of The Diamond Group, is a highly sought after retirement consultant. After much success in Minnesota, Wisconsin, Florida, Texas, and Arizona he has chosen to come home to raise his family in Forest Lake. The residents of Washington County and the surrounding areas should be eager for the new opportunity to work with his firm.

Alan Schmidt explains, "We are there to make sure people, either still working or already in retirement, can enjoy their retirement, rather than finding themselves with insufficient income to support their desired lifestyle. I invite everybody to come visit us to see what we can do for them or just to say hello."

The Diamond Group offers a few very specific services, the first of which is their popular Individual Pension by Design. Schmidt believes that as every person is a unique individual, his or her pension should be unique and individualized as well, based on specific desires for retirement. He aims to help people "live happily ever after" - at least financially.

Another popular program is the CD Repair Shop. Schmidt encourages people to explore a MYGA as an option versus a CD for the fixed rate portion of their portfolios. "Bankers would like you to believe that CDs have a lower yield because they claim money held by banks is safer, which is a common misconception." Schmidt also said "MYGA rates are higher because of how the yield is determined. MYGA rates are determined by investment yields, such as high-quality bonds that are continually adjusted for market conditions. Therefore, MYGAs tend to be much more stable with a higher rate of return as compared with a CD for the same time period." People are encouraged to visit their website for current comparisons, that are updated weekly.

For more information about the services they offer, visit www.thediamondgroup.co or call (651) 321-2444.

The Diamond Group

The history of the pension shows they were underfunded or mismanaged and because of that are now practically nonexistent. We can fix this problem by simply making a few changes to your current strategies.
