All-Natural High Potency Deer Antler Velvet Extract, VelPure Ultra Now Available Worldwide

March 08, 2017

March 08, 2017 - PRESSADVANTAGE -

VelPure, a New Zealand-based company, announced the launch of its new online store, making VelPure Ultra, a natural alternative for joint pain, available worldwide.

Wellington, NZ ? VelPure Ultra, a standardized, safe, high potency and premium 100% natural deer antler velvet extract from VelPure, New Zealand, is now available worldwide. The company?s triple refining process concentrates the essential proteins, amino acids and IGF factors, while enhancing the bioavailability to 80%.

?Harvested from free-roaming, grass-fed New Zealand red deer at the peak of potency under strict guidelines enforced by the New Zealand Food Standards Authority, our deer antler velvet is of the finest quality. VelPure Ultra is certified free of GMOs, growth hormones, drugs, gluten, soy, corn and wheat,? said VelPure founder Forrest Smyth.

Deer antler velvet offers numerous anti-inflammatory, anti-fatigue, anti-stress and adaptogenic benefits that

are attributed to its super food composition of 40 key compounds and 400 active ingredients, 13 growth factors, 21 amino acids, 20 glycosaminoglycans and many minerals and trace elements, including the powerful protein IGF-1. (http://www.chinaphar.com/1671-4083/20/279.pdf)

VelPure Ultra builds joint cartilage and boosts elasticity and flexibility. Used in traditional Chinese medicine (TCM) to treat a wide range of ailments, fractures, injuries, and to enhance wound healing, deer antler extract is proven to be a useful biopharmaceutical. It can be taken safely in conjunction with a number of rheumatoid arthritis medications. This unique nutrient-dense food offers other general health benefits such as immune system support, anti-inflammatory properties, faster recovery from exercise, improved strength and endurance, and healthy skin.

?Sustainability and humane treatment of the deer are central to our philosophy. Our deer are routinely tested and monitored for disease and agricultural and chemical contaminants, including chronic wasting disease (CWD), pesticides, fertilizers and PCBs,? said Smyth.
