

National Alloy Solutions Offers New Thermal Spray Solutions

August 23, 2016

August 23, 2016 - PRESSADVANTAGE -

A thermal spray and coating business in Porter, TX, is proud to announce that they now offer new thermal spray solutions through their Manta brand. These solutions are proving to be popular the world over, not in the least due to the high quality coatings they offer, which have all been tested. Their full range of thermal solutions is now so extensive that all types have been included.

Charles Felchak from National Alloy Solutions says: "We offer a wide range of MCrAlY coatings, metal alloys, carbides, ceramic oxides, and precious metals powders as well as the highest quality pure metal, metal alloy and carbide thermal spray wires and rods in various sizes, in stock, ready-to-ship, for all your thermal spray coating applications."

Besides offering these types of coating applications, they can also offer spray cells for complete coating systems. These include things, such as dust collection, acoustical enclosures, chillers, turntables, and all other types of thermal spray applications. Some of the areas they focus on specifically include plasma spray equipment, arc spray, and HVOF. Furthermore, the company is able to customize existing spray facilities by adding individual systems. This enables their customers to increase their coating capabilities.

National Alloy Solutions has an extensive team of experts on board. Full details about the individual team members and their areas of expertise are available through the company's LinkedIn account. Their team members are ready to look at the requirements of individual clients in order to ensure they receive the right equipment and thereby optimize their production.

National Alloy Solutions is conveniently based in Houston, TX, which is the global heart of the oil and gas industry. And while this is their physical location, they are also able to offer their services across the country and in fact the world. "We support petrochemical, oil tool, automotive, aerospace, and IGT industries all over the world," adds Charles. "We provide machine and grinding shops with top quality thermal spray consumables and equipment."

People are encouraged to contact National Alloy Solutions for further information on their products and the work that they are able to do.
