

Colore Art Offering Free Bonus And Free Gift When Customers Purchase Liquid Chalk Pens On Amazon

June 13, 2015

June 13, 2015 -
Angela Middleton, spokesperson for the company Colore Art, has announced that when customers buy their liquid chalk pens on Amazon, they will also be receiving a free bonus and second free gift. The Chalk Markers by Colore Art contains a 6mm Bullet and Chisel Tip and a pack of 8 bright vibrant colors.

Angela said that after the customer buys the chalk markers, they will also receive one silicone pen holder as a free bonus. She added that the color of the pen holder varies, and can be pink, yellow, green, blue or orange. For the free gift, customers will be receiving a PDF copy that is titled "All You Need to Know about Chalk Markers". Colore Art said that these free gifts are the perfect complement to what they feel are the best liquid chalk markers available.

Angela Middleton said that she couldn't agree more. She said that she understood the frustration many people have when having to deal with the traditional chalk that usually leaves undesirable markings on the chalkboard. Angela added that because of the amount of dust and stain markings that can be left by chalk, it is definitely not ideal for kids to use, because in many cases, that dust can lead to respiratory problems.

Colore Art solved this problem by creating a metallic tip chalk marker that is designed to be versatile by offering benefits to all types of client preferences. The company said that one of the notable benefits customers will find when using these marker pens is that they are able to create well-defined lines and customers never have to worry about smudging. The eight colors available in this pack are purple, blue, orange, green, white, yellow, pink and red. Jessica Fortlauderdale wrote the following review,

"These amazing Liquid Chalk markers are great for many things! It wipes off easy to, so safe for even kids to use because you don't have to worry about it marking up something you don't want it to! And if it does it wipes off very easily. The colors are very BOLD and BRIGHT so it's great for any store front where you want it to grab someone's attention also great for car windows if you're trying to advertise something. It writes very smooth and neatly it comes with 8 bright colors and a holder for the markers you have to try these. The best liquid chalk markers I have tried yet."

In order to get the best experience from Colore Art's liquid chalk pens, the company recommends that customers only use them on nonporous surfaces such as glass, acrylic containers and chromed metal or plastic. This also ensures that the surface that is being drawn upon can be easily cleaned. The company also encourages people to visit their Amazon storefront where they will find positive reviews written by current customers, and if interested parties would like more information on the company and their products, they are encouraged to go directly to the Colore Art company website.
