Beaverton, Oregon based Pure Vitality Minerals has announced the release of their latest product onto the Amazon marketplace. The company's liquid calcium is now available, and they state that it offers a number of benefits over traditional calcium tablets.

"Our new liquid calcium is a high purity ionic saline of calcium chloride," says Keegan Allen from Pure Vitality Minerals. "It's filtered and tested in our lab to the strictest specifications."

Allen says that the product is designed to make it easier for consumers to get the calcium that they need, without the inconvenience or difficulty of swallowing large pills. He states that it's especially beneficial to children and the elderly, or anyone who typically has difficulty swallowing vitamins or supplements. In addition, those with gastric problems will find it particularly beneficial as the body can absorb it much more easily than traditional calcium supplements. The company says that calcium intake among women, particularly those in menopausal stages, is particularly important to guard against osteoporosis.

"It's also not chalky, so it's very easy to take," says Allen. "It doesn't thicken or clump in the bottle."

The company states that no additions are made to the liquid calcium that would reduce the purity or effectiveness of the calcium. It is not diluted and comes in its purest form with no dyes, sugars, or preservatives added. Allen states that it is all natural and perfect for vegans, diabetics, or anyone looking for a more natural way to get calcium. The company says that the liquid is purified to a high level and is USP verified.

The liquid supplement contains elemental calcium. Pure Vitality Minerals states that a teaspoon of the liquid calcium taken two times each day will provide the RDA of 1000 mg of elemental calcium. The company also points out that they are backing the new liquid calcium with their 100 percent customer satisfaction guarantee.
