

Charlette's Web Pest Control Announces New Crazy Ant Prevention Services

September 06, 2016

September 06, 2016 - PRESSADVANTAGE -

Charlette's Web Pest Control in Houston, Texas, recently announced new treatment methods to rid homeowners of crazy ants. The company says that these ants can often be difficult to eradicate and that they are providing area residents with prevention tips as well as extermination services for the pests.

"Crazy ants are very difficult to control," says Charlette. "We've have started offering crazy ant treatment services to help home and business owners to rid themselves of these little pests before they get completely out of control."

"We don't want you suffering with an infestation," says Charlette. "If you notice these distinct looking ants, it's best to contact an exterminator right away and let a professional handle their eradication."

The company states that this particular species of ant is very versatile and can live in dry or moist environments, making them even harder to exterminate. They nest in rotten wood or soil as well as under rocks and buildings. They are sensitive to cold, which is why they thrive in Texas regions where heat is evident throughout most of the year. Colonies typically contain up to 2,500 ants. The omnivorous ants can be

difficult to control because they dwell inside and out, and they tend to forage far from their nests which makes it difficult for the untrained eye to spot and identify the colonies.

Charlette's Web Pest Control is trained in identifying and eliminating crazy ant colonies. The company provides pest control Tomball homeowners can depend on to eradicate these ants before they can cause damage. With more than 10 years of experience in pest control, Charlette states that their staff members have the knowledge about this ant species to ensure that they are exterminated, and they back all of their services with a satisfaction guarantee.

Those interested in learning more about crazy ants or in contacting the pest control company can do so on their official website.
