
Integrity Imports Expands Asian Import Auto Repair Access Across Shreveport-Bossier Region

November 27, 2026

BOSSIER CITY, LA - November 27, 2026 -
Integrity Imports, an ASE-certified service center specializing in Asian import vehicles, has reaffirmed its commitment to serving drivers throughout Northwest Louisiana by broadening awareness of its auto repair services across five area communities. The center now highlights coverage for motorists in Bossier City, Shreveport, Haughton, Benton, and Stonewall, offering a local alternative to dealership maintenance for owners of Japanese and other Asian import brands.

With more than 49 years of combined experience, the Bossier City-based shop services brands including Honda, Toyota, Nissan, Hyundai, Mitsubishi, Mazda, Kia, Subaru, Lexus, Infiniti, and Acura. The expanded focus on surrounding communities comes as many regional drivers seek dependable, cost-effective maintenance options that follow manufacturer-recommended schedules without the premium pricing often associated with dealerships.

The center provides a full range of maintenance and repair work, from auto air conditioning, battery

replacement, and diagnostics to brake repair, oil changes, timing belt service, radiator repair, and transmission service. Each repair is performed by ASE-certified mechanics using diagnostic tools tailored for Asian import vehicles, allowing technicians to identify and address issues with accuracy.

Todd Clark, owner of Integrity Imports, noted that the decision to emphasize service across neighboring cities reflects a steady rise in demand from drivers outside the immediate Bossier City area.

"Many drivers across the Shreveport-Bossier region own Asian import vehicles and want technicians who understand those specific makes," Clark said. "The goal has always been to provide honest, dependable work and to make that level of service accessible to communities like Haughton, Benton, and Stonewall, not just those close to the shop."

Clark added that the center places particular emphasis on transparency throughout the repair process. "Drivers deserve clear explanations of what their vehicle needs and why," he said. "That approach has built trust over the years, and it remains the foundation of how the shop operates each day."

The center follows manufacturer-recommended maintenance schedules, which help extend vehicle life and maintain performance. Routine services such as oil changes, tune-ups, and diagnostic checks allow technicians to catch potential problems early, while more involved work, including engine repair and transmission service, addresses larger concerns as they arise. Headlight restoration and air conditioning service round out offerings that support both safety and comfort for area drivers.

Seasonal conditions in Louisiana place particular demands on cooling and air conditioning systems, and the center has noted increased attention to radiator maintenance and AC diagnostics during warmer months. Battery testing and replacement also remain common requests as temperature swings affect vehicle reliability.

Drivers across the five communities can contact us today to schedule maintenance or discuss repair needs with the service team. The center continues to position itself as a locally trusted resource for Asian import owners seeking quality work at competitive pricing.

Integrity Imports is a specialized auto repair and service center located in Bossier City, Louisiana, focusing on Asian import vehicles.
