Niko Enterprises Releases Copper Infused Compression Gloves Promo Code

January 01, 2018

January 01, 2018 -
Niko Enterprises, a business in Sheridan, WY, has recently launched their new copper infused compression gloves on Amazon. To celebrate its launch, they have now released a promo code for a buy 1 get 1 free offer available to all customers. As shown from the most recent copper infused compression gloves reviews, this is something that is greatly appreciated.

Pam Bhara from Niko Enterprises says: "We have been almost overwhelmed by how much our clients love our product. As a way to say thank you, we will now offer them a buy 1 get 1 free offer while stocks last. We also want to thank our customers for their amazing words of encouragement. It has made all the hard work worthwhile."

The copper infused compression gloves promo code is automatically applied at checkout. As the product is currently available exclusively on Amazon, the system is equipped with automatic discounts as well. This also ensures that people do not accidentally miss out on the discount.

Pam explains that the gloves have been designed with comfort in mind. They are created using a thin,

stretchy material that feels like a second skin. Being fingerless, they do not hamper movement in any way. Pam Bhara adds: "We wanted our gloves to enhance overall quality of life, ensuring that people could not just continue with their day to day activities, but that they could enjoy them even more."

Those who have used the product have quickly hailed them as the best copper infused compression gloves. Many people have chosen to purchase two, even before the buy 1 get 1 free offer, because they have benefited from them so much. Reviewers come from a variety of backgrounds, with a range of activity levels for their wrists, but all mention just how much they have enjoyed it. "These copper compression arthritis gloves really helped me. I work with computers a lot and have always had troubles with pain in my fingers and wrist but after wearing these, those feelings have gone away. I also type a lot on my keyboard and because they are finger-less gloves I can still type with them very easily...," says an Amazon customer.
