Healthy Clean Pet Announces New Ways To Use Their Natural Dog Breath Freshener

October 27, 2016

October 27, 2016 - PRESSADVANTAGE -

Tucson, Arizona based pet products company, Healthy Clean Pet, has announced a new list of ways pet owners can use one of their most popular products. The company states that there are a number of ways to use their natural dog breath freshener, and adds that it offers a number of benefits to pets and their owners.

Gustavo Guerra, a spokesperson for Healthy Clean Pet says, "Dog owners can use a dental pet spray to keep dogs' breath fresh, but many do not realize how many different ways this product can help."

Guerra states that pet owners should always use only a natural dental spray that is specifically designed for pets, as human products can contain harmful chemicals and ingredients that could cause an adverse reaction in dogs. He says that, "One of the easiest ways to keep the dog's mouth clean and his breath fresh is by using a natural dental spray for pets."

The company states that using the product is easy, and that pet owners can begin by simply spraying the dental product directly on the teeth and gums of their pets to remove odors that cause bad breath. The spray can also be used in pet food or water, or sprayed directly onto the pet's dental treats. Guerra states that it can

easily be sprayed in the pets' bowls if pets are a bit apprehensive about having it sprayed in their mouths.

He says that the product, which can be found on Amazon at <https://www.amazon.com/Healthy-Clean-Pet-Breath-Freshener/dp/B01BCLAJOW/>, is also designed to be sprayed directly on any dog toys. The dog will then chew on those toys, and the product can do its work just as well.

Healthy Clean Pet offers a number of other benefits and ease of use tips on their official website at <https://healthycleanpet.com/>, where instructions for adding the dental spray to toothpaste or directly onto the pet's toothbrush can be found. Guerra states that the spray itself is very easy to use and that it was specifically designed this way so that pet owners would have a simpler time using it on pets to help ward off bad breath and protect the dog's teeth and gums.

Those interested can see the product in use on the company's YouTube channel at <https://www.youtube.com/channel/UCQ7Igh0YsPgFBpvLcRS0tBg>.
