

822 Heat and Air Unveils Expanded Residential Furnace Repair and Service Offerings

November 25, 2026

Benbrook, TX - November 25, 2026 -
822 Heat and Air has unveiled an expanded slate of residential and commercial furnace and HVAC services for homeowners and businesses across Arlington, Texas, and the greater DFW Metroplex. The announcement reflects the company's growing focus on complete heating and cooling solutions as cooler months bring increased demand for reliable furnace service throughout the region.

The heating and air conditioning contractor specializes in complete systems for both large-scale commercial and residential customers. Its expanded offerings cover gas and electric furnaces, heat pumps, and ductless mini-split systems, addressing the full range of heating needs found in area homes and businesses. The company handles everything from seasonal tune-ups to full system changeouts.

Residential hvac installation sits at the center of the expanded services. Each project includes load calculations to confirm that a new system is correctly sized for the home, along with ductwork design, gas line connections, venting, and thermostat setup. Technicians at the company are licensed, insured, and

EPA-certified, and the business operates under license number TACLA65080C.

The company also addresses the common breakdowns that leave homes without heat during winter. Its residential furnace repair work covers failed igniters, blower motor failures, control panel malfunctions, gas valve problems, and related issues. Safety-first inspections include carbon monoxide and combustion checks, which the company notes are especially important for older systems that may develop cracked heat exchangers.

A spokesperson for 822 Heat and Air, said the expanded services respond to a clear seasonal need across the metroplex. "Heating problems rarely arrive at a convenient time, so the goal is to give homeowners and businesses one dependable source for maintenance, repair, and full installation," they said. "Correct sizing and a safety-first inspection make a measurable difference in both comfort and long-term efficiency."

For homeowners weighing repair against replacement, 822 Heat and Air provides honest assessments rather than automatic upsells. The company points to several indicators that a system may be reaching the end of its service life, including an age beyond fifteen years, frequent repairs, uneven heating, and rising energy bills. Transparent, upfront pricing allows homeowners to understand the furnace replacement cost before any work begins, and financing options are available subject to credit approval.

The spokes person added that clear communication remains central to how the company operates. "Every recommendation comes with upfront pricing and a plain explanation of the options," David said. "When a repair makes more sense than a replacement, that is what gets recommended."

822 Heat and Air is a professional HVAC company serving both commercial and residential clients throughout Crowley, Burleson, Benbrook, Granbury, Joshua, Godley, Cleburne, Alvarado, Fort Worth, Arlington, Dallas, and the greater DFW Metroplex and surrounding suburbs. The company offers commercial HVAC, residential HVAC, ductwork, and AC tune-up services, with a focus on energy-efficient systems and transparent pricing. Its technicians use current tools and techniques to install, repair, and maintain heating and cooling systems for homes and businesses. Financing options are available subject to credit approval and offer eligibility.
