Exclusivelyhybrid.com Introduces New Lexus Hybrid Battery Repair and Replacement Service For South Florida Residents

June 19, 2015

June 19, 2015 -
Exclusivelyhybrid.com has now introduced services to help all South Florida Lexus Hybrid car owners with the repair or replacement of the hybrid battery powering the vehicle. The company is South Florida?s premier Hybrid Battery Service offering profession quality services at affordable rates.

Hybrid cars have been around for over 10 years now and while at first the demand for the new technology was limited as owners were learning about the benefits of the hybrid car, in recent years the demand has been steadily increasing. This increase in demand for hybrid autos has resulted in a corresponding increase in the demand for help with the unique hybrid battery which helps provide the benefits to owning such a vehicle.

As with any car, at some point the battery needs to be repaired or replaced. In the case of the Lexus Hybrid things are no different except that in general, all hybrid batteries require a specialized training and handling to be managed properly. These technically advanced batteries can?t be fixed using ordinary techniques. And this is exactly where the services of the professionals at Exclusivelyhybrid.com enter the picture.

?We specialize in helping hybrid car owners in the repair or replacement of their batteries. My staff are highly trained to be able to meet the increased demands of servicing these hybrid batteries and we are ready to help with the Lexus, Toyota and Honda Hybrid models.? says Alex Valler, Founder and CEO of ExclusivelyHybrid.com

Alex has been involved in the auto industry for many years working with some of the largest name in the business. A few years ago Alex noticed a need for affordable high quality help with these hybrid batteries and his love for cars and technology drove him to start Exclusively Hybrid.

With offices located in Lake Park, FL he and his staff are perfectly positioned to help hybrid owners anywhere in South Florida who can ship the car to him to work on. Recently, Alex has seen an increase in calls from owners who required some special attention and couldn?t manage to get the hybrid to his workshop so what did he do? The next best thing! He launched his new ?Mobile Hybrid Battery Repair and Replacement Service? for the Toyota Hybrid and Honda Hybrid models only as the Lexus Hybrid requires work to be done in the workshop. This allows him or a member of his staff to travel to anywhere within a 150 mile radius of his Lake Park, FL workshop to help people get the specialized service he offers.

?We understand that these Hybrid Batteries are a unique Technology and we want to make our services available to as many hybrid owners as we can in South Florida. If you are within our service area and you can?t get your Toyota Hybrid or Honda Hybrid car to us, we will come to you. Just give us a call and we can set up the appointment to get you the help you need right away.? says Mr. Valler. ?If it?s a Lexus Hybrid you can get the car to us and we can fix the battery right away.?

With services like these and the personal touch offered by the company it?s no wonder Exclusively Hybrid is getting rave reviews from its customers.

Here is what just a few recent hybrid car owners had to say about Alex and his professionalism:

"When the hybrid vehicle battery in our 2005 Prius died, the dealer's repair cost was beyond our means. We were in despair. Then we found Exclusively Hybrid. Alex came to our rescue with prompt, efficient, trustworthy service, offering far better repair terms and products than we could find anywhere else. Best of all, Alex makes house calls! The entire repair took place in our driveway, saving us time, anxiety and aggravation. The car is running like new and we are thrilled. Thanks, Alex! You are our hero.? Susan

"When my 2006 Prius battery died fortunately I searched the internet and found Alex. He is a guru for hybrids and has given me excellent customer service. He replaced my main battery with a rebuilt one that is working great, and a month later replaced the smaller battery. Not only did he save me thousands of dollars, but today

he also contacted a Toyota dealer for a new problem I am having that is apparently under extended warranty. I highly recommend Alex - he is honest, trustworthy and he cares! I believe that I am so lucky that I found Alex and that he is in my area. - Alex is the man when it comes to hybrids." Enid

Now helping Lexus Hybrid Car Owners as well as the other models he services, Alex and his team of professionals at Exclusivelyhybrid.com seem to be a solid choice for every South Floridian who needs help with the repair or replacement of their hybrid car battery.

If you need assistance with your Hybrid battery for the Lexus Hybrid, Toyota Hybrid or Honda Hybrid, feel free to use the contact information below to set an appointment.
