Popular Sequin Tank Top Now Available In Dazzling Gold Color

July 23, 2018

July 23, 2018 -
Anna-Kaci, a fashion store in Anaheim, CA, is proud to announce an update on one of their popular products, the sequin tank top. They have added a beautiful new dazzling gold color for this product that they have found to be particularly popular and fashionable this summer. Originally, the product was only available in rose gold and silver.

Yan Li from Anna-Kaci says: "We aim to provide our clients with the most fashionable garments befitting of this season's trends. Our sequin tank top has been popular for some time now, but we have noticed in the big fashion shows that this summer is all about the dazzle. Hence, we are happy to have been able to design this popular top in gold sequins as well."

The top is made from 100% polyester. It is a two layered top with a stylish ruffle bottom hem. It also features a comfortable inner layer that makes the top flow on whoever wears it, adding a unique, soft, and cute feminine touch. The sequins are incredibly glamorous, but the semi sheer ruffle hem means this top can be worn for any occasion. Yan Li points out: "Whether you're going out for a night on the town, to work, or for a day at the beach, prepare to dazzle everyone you encounter."

The gold sequin top is highly fashionable and looks as if it came straight off the catwalk. It features a scoop neck and sexy spaghetti straps. These lie comfortably on the shoulder and the low neck line makes this a very sexy top, while it can also be easily pulled back to create a more modest appearance. Yan Li suggests: "Pair it with a blouse or a vest and it is perfect for colder nights as well. This really is a top that can be worn all the time and we are so happy to see that our customers love it."

Indeed, those who have purchased the top have all stated that they love its style and comfort. They also noted that the fit is very loose, which makes it feel more comfortable. The looseness of the spaghetti straps means that women can wear it as far down or as far up as they want, creating their own unique look and style.

The top is currently exclusively available from Anna-Kaci's Amazon store. They encourage people to refer to the measurement chart that is included in the product description in order to ensure that they are purchasing the correct size. Naturally, the company is also happy to answer any questions about sizing, material, colors, or any other element of the shirt. As a registered trademarked fashion house based in California, the store has made a real mark on the world of fashion.

Yan Li continues: "We aim to offer our clients with fashion and style, but in an affordable manner. We take inspiration from some of the world's biggest fashion houses, creating pieces that emulate their catwalks, while adding some unique details at the same time. We're very happy to see how much our customers appreciate this."

Sequins are indeed found across the world of fashion at present. Certain designers have created entire garments made from sequins, whereas others focus more strongly on accessories and jewelry. Sequin tank tops with ruffles were popularized by Malene Birger, a Danish designer that has took the world of fashion by storm. She was one of the first to move outside of the children's arena when it comes to sequin clothing and Anna-Kaci has been inspired by her designs, adding their own personal twist to make the garments more comfortable and suitable for everyday wear.

When it comes to the gold tank top women have been particularly pleased about the fact that it isn't 'cheesy'. Yan Li explains: "Sequin tops were hugely popular in the 80s. They disappeared after that and recently made a comeback but focusing particularly on younger audiences, who enjoy moving the sequins to reveal hidden messages. Our top is classy and beautiful. It doesn't have the garish, over the top feeling that was so popular in the 80s, nor is it suitable for children. Rather, it is a glamorous, sparkling top that can be worn for parties and board meetings alike. In fact, we have even heard from some customers who have worn it for stage theater and cosplay productions. It truly is multifunctional and works brilliantly when layered. Plus, thanks to the stylish ruffle, the shirt is extended so it can be worn over any type of bottoms, from skirts to leggings."
