
Topcon Introduces Topcon Harmony and Triton Swept Source OCT at the 2018 American Academy of Ophthalmology (AAO) Annual Meeting

October 24, 2018

October 24, 2018 -

CHICAGO, IL - Topcon is attending the 2018 American Academy of Ophthalmology (AAO) Annual Meeting in Chicago to demonstrate its latest innovative technology solutions for today?s ophthalmologists. AAO will mark the debut of Topcon Harmony, the next generation in ophthalmic data management. Harmony replaces Synergy and features a completely redesigned browser-based user interface that includes new features and vendor-neutral connectivity.

John Trefethen, Vice President of Marketing & Product Design for Topcon, stated, "The last few months of hard work and preparation will be showcased at AAO starting on October 27th. We are proud to demonstrate Topcon Harmony, the next generation of clinically relevant access to rich data sets in support of better patient outcomes. What was merely data management has evolved into a feature-rich set of tools every clinician should experience first-hand. New features have been added that give users faster access to the information and patient exam histories they need. I am really impressed by what the entire Topcon team

has accomplished."

Topcon is also revealing a new pricing structure for Topcon Harmony and Topcon CLOUD at AAO. Topcon CLOUD is the automated, cloud-based, device backup solution that meets HIPPA requirements, provides scalable storage options, and supports a disaster recovery program.

Thai Do, the Topcon Harmony Product Manager, stated, "The new software provides a clean interface and builds a solid foundation to support the future product roadmap.? Thai Do will be on-site at Topcon Booth #3745 for live demonstrations and ready to answer any product questions.

In addition to its software solutions, Topcon will also be displaying its full line of ophthalmic diagnostic equipment including the new Triton Swept Source OCT. The Triton is the 1st commercially available multimodal Swept Source OCT in the US. It combines Topcon?s years of experience in imaging technology with the diagnostic power of SS-OCT. The Triton features 100K A-scans/sec, a 1,050nm light source that allows you to image deeper into the retina and through media opacities, a high-density widefield OCT Scan, and the ability to view the vitreous and choroid in the same scan.

On Sunday evening, Oct. 28th, Topcon Medical Systems, Topcon Healthcare Solutions and Review of Ophthalmology are partnering to discuss Innovations in Swept Source OCT. This symposium will review the latest clinical and technical advances in SS-OCT including the potential of Arti?cial Intelligence in ophthalmology. Be sure and visit Topcon's AAO page to learn more and reserve your seat.

Stop by Topcon?s Booth #3745 at AAO to learn more about our innovative technology solutions.

About Topcon

Based in Oakland, NJ, Topcon is a comprehensive ophthalmic device manufacturer within the worldwide ophthalmic community. It introduced the world?s first commercial back-of-the-eye spectral domain (SD) and swept source (SS) optical coherence tomography (OCT) systems, which have driven innovation in eye-care.

More recently, Topcon Healthcare Solutions started to enhance not only its hardware but also its software solutions. To become the leader in diagnostic software, Topcon has developed a new strategic division whose primary objective is to create world-class software solutions for the eye-care industry and beyond. The company' products enable the collection and visualization of a wide range of imaging and clinical data while providing quantitative and clinical analysis capabilities.

Topcon?s software gives clinicians access to patient exam data captured from OCTs, Visual Fields, Fundus cameras, and other Topcon and third-party devices. Topcon leverages its image management software

called Harmony, where practitioners gain access to DICOM and non-DICOM information stored in a central, cloud-based environment. Additionally, Topcon now provides an integrated service that connects practitioners to an extensive network of reading services to assist in the management of sight-threatening eye diseases.
