Versatile Roofing Pros Announces Launch of New Website for Maplewood Roofing Contractors

November 30, 2018

November 30, 2018 -
Mike Salfer of Maplewood Roofing Pros announces a new website for their roofing contractors. This website gives homeowners a way to browse work done by Maplewood Roofing Pros and also contact a team member to set up a consultation. Winter season, before the snow, is the best time to have roofing work done, in preparation for the harsh cold weather.

Maplewood Roofing Pros, a Versatile Roofing Pros company, has been in the roofing business for over 20 years, serving both residents and business owners of Maplewood and beyond. This family-owned and operated business prioritizes friendly customer service, knowledgeable estimators, and skilled roofing experts. They understand that their business relies on this model in order to best serve their clients.

When approached about this announcement, Mike Salfer was glad to share this comment, ?As the cold weather approaches, it seems like it wouldn?t be the best time to have a roof repair or replaced. On the contrary, there isn?t a better time - at least for a consultation or estimate. Our new website will help facilitate a contact form for homeowners making this consideration. A friendly team member will promptly reach out to help you get started. If you wait until spring, you might have expensive damage and have lost a lot of money

in heating costs that could have been saved.?

Maplewood Roofing Pros, a Versatile Roofing Pros - Maplewood company, dedicates itself to the needs of the community it serves. They focus on using high-quality materials installed by highly-experienced roofing contractors. They want their clients to be able to enjoy their lives without worry or disruption while their roof is repaired or replaced.

Jerry B., had his roof replaced last winter and wanted to share his experience in this review, ?I was concerned that I was losing a lot of heat through the roof. My heating costs every year had gotten higher and higher, but it was nearly impossible to keep my house warm. I contacted the Roofing Pros in Maplewood and they were able to come out for a consultation. They discovered that my roof had been improperly installed to begin with, and wear and tear over the years had made many of the shingles loose! They ended up replacing the entire roof for me and my house was the warmest it had been during the winter in a decade.?

Roofing companies, like Maplewood Roofing Pros, offer a much boarder service than simply repairing or replacing the roof. The roof is designed to do more than simply keep the rain out. It should keep the heat and air conditioning in when necessary and also protect from pests like animals and insects. If a roof is in need of repair or replacement, delaying only increases the chances of an infestation or inhabitation.

Chelsi Freeman also chose Maplewood Roofing Pros for her roofing repair. ?I was recommended by a friend who had their roof repair done by them. When I called, they came out the next day for an estimate and consultation. Thankfully, I only needed a few shingles replaced, but they were in a highly visible spot. I was worried about mismatch look and the assured me they would order a color that would match the weather-worn tiles that were already there. I honestly didn?t expect to get an exact match, but they really delivered. A year later, I couldn?t tell you which tiles were replaced!?

The roof of a house is designed to be tough, but it isn?t impenetrable or invincible. Weathering over the years will break down the materials, but a good maintenance schedule will prevent the need for a full replacement - simply due to wear and tear. Maplewood Roofing Pros, a Versatile Roofing Pros roofing company, suggests having a yearly consult to ensure that a roof doesn?t need maintenance or repair.

Todd Overby has been on a maintenance schedule for several years with Maplewood Roofing Pros. This was his first experience with the company, ?I had read an article about hidden roof damage that causes wood rot and started to worry that could have happened to my roof. I called Maplewood and they came out right away to check. Thankfully, I did not need a repair, but they were glad to come out once a year to check. Thanks guys!?
