

American Survival Magazine Launches New Guide: How to Build a Backyard Greenhouse

November 22, 2016

November 22, 2016 - PRESSADVANTAGE -

Boynton Beach, FL: Survivalist Magazine, the premier publication and most respectfully recognized name in the emergency preparedness industry, proudly announces the release of a new guide book by renowned author Tristan Trubble titled *How to Build a Backyard Greenhouse*. As part of the company's ongoing efforts to reduce carbon footprints traditionally associated with the physical print industry, and to remain more environmentally conscious, this education rich resource is currently available on the Amazon Kindle store for immediate purchase and download. Customers may also order a physical print copy on demand through Amazon's Createspace company.

"One of our all-time best-selling guides has been *How to Build a Backyard Greenhouse*," states George Shepherd, founder and CEO of Survivalist magazine, and its parent company CDI Publications. "We are heading into winter and some of our treasured members have requested additional assistance with getting the greenhouse built. We assembled this guide earlier this year and offered it on Amazon Kindle; however, enough members requested a hard copy so we also made it available on Amazon's Createspace website."

Previously published with flip book style formatting and offered digitally, this information and education

resource is now available through Amazon Createspace, allowing customers to order a physical print copy on demand and consume the information in the style that serves them best. Author Tristan Trubble has assembled the content for How to Build a Backyard Greenhouse, and presented it in an easily understood and simple to follow format, guiding the reader from one chapter to the next. Readers will discover the intricacies of building a backyard greenhouse, as well as topics that deserve serious consideration, such as care and maintenance.

?Quite a few US residents live in regions where winter weather wreaks havoc on crop cultivation,? explains Shepherd. ?From the prepper mindset, it is imperative that we take the necessary steps to ensure our own survival, and one of the most important facets of that matrix is being able to grow your own food, harvest seeds, maintain soil composition, etc. For most of us that means building a backyard greenhouse to get us, and our crops, through the harsh climates associated with winter,?

Survivalist magazine, one of the most respected leaders in the emergency preparedness and disaster survival industry, strives to maintain daily contact with their fans, followers, and members through a variety of online portals, such as webinars, podcasts, summits, workshops, articles, white papers, emails, DIY projects, survival guides and new blog posts on Steemit.
