

Oceanside Pool Expands Throughout San Diego County

December 15, 2016

December 15, 2016 - PRESSADVANTAGE -

Carlsbad CA pool service offers residential and commercial business tasks related to pools and spas. The firm has expanded their services to customers throughout the entire San Diego County.

Carlsbad CA: Oceanside Pool Service and owner Steve Thompson are pleased to announce that they are one of the premier commercial and residential pool and spa servicing companies with customers throughout the San Diego County. Every member of the team recognizes the importance of customer satisfaction, respect, and friendly response. The customer experience is designed to reach 100 percent satisfaction. The communities of Cardiff-by-the-Sea, Carlsbad, Del Mar and 4S Ranch, as well as Encinitas, Escondido, Poway and Ramona, are all part of the service area.

According to Steve Thompson, "We feel very strongly that we have attracted some of the top technicians in the industry. They not only understand pool and spa servicing, but they also understand the culture that we have built from the top down over the years of being in business. North County San Diego is the absolute best place to live in the world and we are proud to be a part of the business community here."

Many residents and business owners throughout the County have realized the benefits which come with the installation of a personal pool or spa. Those inhabitants who have purchased a residence with a pool or spa already installed may not realize the work and cost involved in maintaining the pool. Pool costs may cause the owners to use the pool less or to absorb a larger than necessary utility cost.

The pool service provided by Oceanside includes solutions for many different issues. These range from one time or weekly cleaning and maintenance to more comprehensive services such as equipment repair, removal, and installation of motors, pumps and filters. Routine tasks can include water chemistry testing and adjustments, tile cleaning and calcium deposit removal, emptying of skimmer and pump baskets, algae removal and cleaning the cell of salt water. The team will do a sand change when needed, repair pool leaks and install a salt system.
