Plumbers Edmonton Teams Up With Capital Plumbing & Heating To Expand Home Services

March 21, 2019

March 21, 2019 -
Alberta based Plumbers Edmonton is pleased to announce that they recently teamed up with Capital Plumbing & Heating to offer heating and air conditioning services to residents of Edmonton and its surrounding areas.

Lief Simons from Plumbers Edmonton said, ?We are excited to partner with Capital Plumbing & Heating because they are considered one of the top HVAC companies in Alberta. They are a proud member of Plumber?s Success International since 2008, and have been providing professional plumbing and HVAC services to the local community since 2001. They are also known for their commitment to providing excellent customer service, as evident by their 4.8/5.0 rating on Google reviews and Facebook recommendations.?

One of their many satisfied customers, Jason Banack, said, ?My home was built almost 20 years ago, and many of the mechanical components already need replacing. I contacted Capital Plumbing to look over everything, and after a thorough inspection, they suggested a number of tasks that should be taken care of immediately, and others that could likely wait. They replaced two hot water tanks and two furnaces in less than two days, and within a week of me asking. Their reception desk was very responsive, and the onsite

technicians were very knowledgeable and easy to deal with. I recommend this company highly.?

Meanwhile, as noted on the company?s website at https://plumbers-edmonton.ca, Plumbers Edmonton now offers heating, air conditioning, and other HVAC related services in addition to their existing plumbing repertoire. ?We are now offering 24/7, ultra speedy, emergency residential plumbing and HVAC services in the greater Alberta area. By hiring us, you will get the assurance of receiving high quality services because all of our plumbing professionals, and HVAC technicians, are fully certified, licensed, bonded, and insured,? Simons said.

In terms of plumbing services, he explained that the company provides both emergency repairs and routine maintenance services. He also pointed out that they specialize in addressing all types of plumbing related problems, including faulty water heaters, frozen pipes, dripping faucets, boiler repairs, clogged pipes, low water pressure, and leaking toilets. On the other hand, they now offer emergency and routine maintenance HVAC services in addition to the repair and installation of furnaces and air conditioning units.

Furthermore, Simons highlighted the importance of having a regular HVAC and plumbing maintenance regimen to ensure that each system is working efficiently. He explained that preventative maintenance not only extends the lifespan of the systems, but also reduces the likelihood of experiencing major breakdowns and severe damage in the near future. He also pointed out that regular plumbing and HVAC maintenance may result in more savings in the long run.

?Plumbers Edmonton is dedicated to providing prompt and reliable plumbing and HVAC services. We have courteous personnel and live operators to help you, and our trained, experienced, and uniformed technicians are capable of providing high quality services. Furthermore, we have flexible pricing and repair options, and provide our customers with a workmanship and parts guarantee as well,? Simons affirmed.

Those looking for an established and reliable plumbing and HVAC contractor may reach out to Plumbers Edmonton by calling their office hotline, or by visiting their Google site at https://sites.google.com/view/plumbers-edmonton. Their service areas in Alberta include Edmonton, Sherwood Park, St. Albert, Spruce Grove, Stony Plain, Gibbons, Beaumont, Bon Accord, Fort Saskatchewan, Devon, Morinville, and Calmar. Furthermore, they have received a large number of positive reviews and recommendations from many of their previous customers.

Michael Sather said in a Facebook review, ?Plumbers Edmonton is probably one of the best plumbers out there. I called in the middle of the night due to some leaking pipes, and their technicians arrived at my house in no time. They fixed the problem quickly, and I was very satisfied with their work. Their technicians are also very professional and friendly. I highly recommend them.?

More information can be found on the company?s website. Interested parties may also contact Lief Simons of Plumbers Edmonton to learn more, or connect with the company through their official social media pages on Facebook, Twitter, and YouTube. Alternatively, online users may check out the company?s Wordpress page at https://liefsimons.wordpress.com for a number of useful tips and advice on how to properly maintain plumbing and HVAC systems.
