

New Lincoln Bathroom Remodels Firm Launch Announced

January 05, 2017

January 05, 2017 - PRESSADVANTAGE -

Lincoln-based contractors offer dedicated bathroom remodeling services to area residents. The professionals provide a complete solution to all bathroom remodeling and renovation needs.

Lincoln NE: Lincoln Bathroom Remodels and Jeff Coseo are pleased to announce the launch of their new company which specializes in bathroom remodeling needs. LBR offers a complete solutions to all bathroom remodel needs. Everything from custom tile work to prebuilt layouts is part of the skill set for the firm. The professional team begins their work with a consultation to help determine the style of bathroom desired by the customer. The design team provides a package of options for designs and concepts in the process.

Lincoln bathroom renovation techniques cover many different disciplines and skills. Some of the most common elements of renovation include wall tiles and floor tiles. The type of tiles as well as the color affects the entire look of the room. A more significant feature which is popular, especially in colder climates, is installing heated floors in the room. Changing the lighting and ventilation features can improve the overall

look and feel of the room.

According to Jeff Coseo, "Some of the items in a renovation which many people don't think about include the fixtures. The vanity is one of the largest items that help to set the style. It may be best to pick the vanity first and choose other elements to fit the style of the vanity. Even if you keep the same vanity, you may want to replace the faucets with more attractive choices."

Today's design features allow for a wider choice of toilets than was available in the past. They don't have to be white porcelain with a tank, Coseo says. To provide a new look in the bathroom, the homeowner can explore some attractive designs and water saving features. An attractive shower head sets off the look of a modern shower. There are many designs for the shower head and the controls that can change the look of a bathroom.
