

St Johns Wood Dentist Surgery Opens

January 18, 2017

January 18, 2017 - PRESSADVANTAGE -

Smile Cliniq Dental Practice offers services at a new surgery in St. John's Wood and is accepting new private patients. The award-winning dental practice is proud of the high quality treatments.

London UK: Smile Cliniq Dental has now opened a new surgery in St John's Wood and is accepting new private patients. The new St Johns Wood Dentist practice will offer a range of cosmetic and general treatments, including dental implants, teeth whitening, Inman aligners and Invisalign. The practice has achieved a number of awards for the quality of treatments that it offers. The professionals at the St Johns Wood clinic were awarded Best Young Dentist London and UK, and Best Dental Practice in London.

The team at the dental practice in St Johns Wood understands that patients may feel somewhat nervous at the thought of having dental treatments, especially if there is a fear of dentists. Patients are encouraged to feel at ease, welcomed by friendly and knowledgeable staff, anxious to help. When planning treatments, a full explanation, costs and advice is provided to the patient so that he or she is fully informed before treatment is begun.

Smile design is offered by the team at the clinic. A consultation begins with advanced computer imaging and digital photos. This process allows for the patient to view before and after images of the new smile, before any procedures even begin. All processes and procedures are described in detail so that the patient has knowledge of what to expect. Budget constraints are examined so that the procedures are affordable.

In a recent interview, a representative of the dental practice explained, "We are dedicated to bring patient's state of the art, cosmetic and general dentistry at an affordable price. We offer various cosmetic treatments such as white fillings and crowns, highly aesthetic veneers that look just like natural teeth, and various orthodontic treatments to include Inman aligners, Invisalign, and conventional orthodontic bracket braces. General dentistry and oral health practices are included in the range of services offered at the clinic."
