Metal Roofing Edmonton Company Gets Large Number Of Highly Positive BBB Reviews

July 02, 2019

July 02, 2019 - PRESSADVANTAGE -

DDCL Roofing & Maintenance, a metal roofing company based in Edmonton, Alberta, has announced with pride that they have received a large number of mostly five star BBB reviews. The result is an overall BBB rating of A+. The company explained that the highly positive roofing Edmonton reviews are the result of their use of high quality supplies even for general jobs for residential, commercial, and industrial buildings. In any project that they handle, they make use of the highest quality materials at the best available prices and standard materials with high warranty.

Daniel Foulkes, owner of DDCL Roofing & Maintenance, says, ?We?re both excited and proud to have received so many five star BBB reviews. We provide a superior roof replacement or repair service to protect your home from the environment (weather) extend the roof's life and provide quality maintenance services in your home so you can relax worry free.?

The services provided by DDCL Roofing & Maintenance include roof replacement, roof repair, flat roofing, metal roofing, and steel roofing. Projects that they have worked on include submersible pump replacement, Murphy bed installation, levelling of A deck, wood siding repair, reshingling of shed, roof

replacement, bathroom remodel, light fixture replacement, and concrete levelling.

The metal roofing Edmonton services provided by DDCL is either installation or repair because corrugated metal roofs still deteriorate and rust even with acrylic coating over time. Standing seam metal roofs can corrode once their aluminum or zinc coating get stripped off because of aging. Therefore, DDCL has a team of metal roofing professionals to take care of the maintenance and repair of such roofs.

DDCL Roofing & Maintenance has three main service areas with the main service area being Edmonton. In Edmonton, the company offers various services such as roof replacement, roof repair, flat roofing, metal roofing, and steel roofing. Because of its humid continental climate, the city of Edmonton suffers from some of the coldest winters and mild summers. This puts undue strain on the roofs and therefore a dependable roofing contractor is required to repair roof damage. According to Daniel Foulkes, they are capable of offering repair and replacement of commercial property roofs, whether they are using TPO, EPDM or PVC roofs. They are also capable of providing repair services for metal roofing and steel roofing.

At Leduc, Alberta, DDCL also serves as the top roofing company. Here, DDCL works with several roofing materials for both residential and commercial buildings, such as asphalt shingles, metal roofing, cedar/wood shakes and shingles, PVC, TPO, EPDM, and clay and slate tile roofing. And because prevention is truly better than cure, DDCL offers high quality roofing maintenance plans at Leduc. By utilizing tried and proven test methods and state-of-the-art equipment, the team from DDCL provides a comprehensive picture of the client?s roof and suggests the best maintenance options to keep the roof in top shape.

Meanwhile, DDCL also offers bathroom remodelling services in Leduc. For homeowners who are tired of their bathroom?s appearance or want to boost their property value, remodelling the bathroom is highly recommended.

Another important service area for DDCL is Nisku, Alberta. Both residential and business properties in Nisku also need to endure cold winters and mildly warm summer. Thus, they also require the services of an exceptional roofer to handle roof repair and maintenance requirements. DDCL has decades of experience in providing high quality roofing services for Nisku residents. Roof materials that they can repair, replace, or install include asphalt shingles, clay and slate tiles, residential metal roofing, and single-ply membranes. And before staring roof repair, they will also inspect the roof deck and offer advice on possible repair options.

DDCL Roofing & Maintenance offers superior roof replacement or repair service to protect homes in Edmonton and other areas such as Leduc and Nisku, Alberta. Those who require more information regarding their services and service areas can visit their website or contact them phone or via email.
