

USA Cabinet Store Announces Kitchen and Bath Remodeling Trends for 2026 Featuring Nature-Inspired Color Palettes

October 10, 2025

FAIRFAX, VA - October 10, 2025 -

USA Cabinet Store, a leading provider of cabinetry and remodeling services across multiple states, announces its alignment with emerging 2026 design trends that mark a significant shift from all-white kitchens to warm, nature-inspired color palettes. The company's partnership with Fabuwood positions them to meet growing demand for two-tone designs and earthy neutrals that industry forecasters predict will dominate residential renovations in the coming year.

The transition away from sterile, monochromatic kitchens represents one of the most significant design shifts in recent years. According to industry data, only 29 percent of designers now prefer all-white kitchens, while light wood stains have emerged as the top cabinet finish preference for 2026. This evolution reflects a broader movement toward creating warmer, more inviting living spaces that incorporate multiple colors throughout the kitchen, a trend that has increased by 15 percent over the past two years.

USA Cabinet Store's kitchen remodeling services now emphasize these nature-inspired palettes, featuring colors like forest green, cabernet red, mushroom taupe, and warm cream tones. The company's design teams are implementing these trending colors through Fabuwood's Designer Collection, which was developed in collaboration with Creative Director Kerrie Kelly and color experts to align with 2026 forecasts.

"The shift from all-white kitchens to warm, earthy palettes represents more than just a trend?it's a fundamental change in how homeowners view their living spaces," said Emin Halac, CEO of USA Cabinet Store. "Our partnership with Fabuwood enables us to offer semi-custom solutions with 2-4 week lead times, allowing customers to access custom colors from Benjamin Moore or Sherwin-Williams catalogs. This flexibility is crucial as we see increasing demand for personalized, nature-inspired palettes that create the warm, inviting kitchens families are seeking."

In bathroom remodeling, USA Cabinet Store is implementing similar nature-inspired trends through floating vanity installations featuring Fabuwood's Valencia Vanity Line. Industry research indicates that 60 percent of designers are now choosing greens for 2026 projects, while 96 percent are incorporating warm neutrals as foundation colors. These organic tones help create spa-like bathroom sanctuaries that have become increasingly popular among homeowners.

The company's Fairfax showroom serves Northern Virginia communities, including Fairfax County, Arlington County, Alexandria, Loudoun County, and Prince William County. The region's mix of historic and modern homes provides an ideal setting for these evolving design trends, as earthy colors like terracotta, sage green, and mushroom taupe complement both traditional and contemporary architecture.

To support customers in visualizing these trending color combinations, USA Cabinet Store offers complimentary VR 3D design services. This technology allows homeowners to explore various color palettes and configurations before committing to their kitchen and bath remodeling projects.

USA Cabinet Store operates 14 showroom locations across Virginia, Maryland, North Carolina, Texas, New Jersey, Missouri, Florida, and Tennessee. The company provides comprehensive remodeling services, including custom cabinetry, countertops, tiles, sinks, faucets, and hardware, managing projects from initial consultation through final installation.
