Southern Perimeter Pest Pros Launches 24-Hour Response Time

February 21, 2017

February 21, 2017 - PRESSADVANTAGE -

Southern Perimeter offers residential and commercial protection to set up a pest-free perimeter around homes and businesses. Professionals respond to service calls within 24 hours.

Effingham SC: Southern Perimeter and Evan Lee are pleased to announce that the team of professionals work effectively to eliminate unwanted pests around homes and businesses. The presence of insect visits to houses, their contents and surroundings is distasteful for health reasons. Aesthetically, pests are not only unattractive, but carry disease and can cause deterioration of the structure of the building itself. Examples of pests which no one wants inside the home include ants, spiders, roaches and others.

For pest control Florence SC businesses have many of the same problems as home owners do. Pests in and around the structure and space are annoying at best and dangerous if allowed to run unchecked. Trying to get work done when there are pests on or in work surfaces is difficult at best. For businesses such as food service or health care, the pests are particularly dangerous and even legally regulated.

According to a spokesperson for the firm, "While no one wants pests in homes or businesses, getting rid of them is not easy. We have the experience, techniques and products which will eliminate unwanted creatures from businesses and homes in a manner that is safe and effective. We are pleased to offer a complimentary inspection of your residential or commercial location and will use the information to develop a plan for getting rid of the pests and preventing them from returning."

He continues, "Southern Perimeter Pest Pros was born out of necessity. We wanted to create a company that stands behind its work and really takes care of people in the process. Our experts have years of experience in the pest control world and look forward to serving you and helping to create a pest-free perimeter for you, your family and your home. We work to provide the highest quality service available from the inspections all the way to the completed treatments."
