Nyloplast Promotes PVC Fitting Products

August 22, 2019

August 22, 2019 -
Nyloplast has recently started promoting their PVC fitting products, which are compatible with most of the underground piping systems used within the United States. Their products provide a secure fit, have a 100-year lifespan, and conform to all ASTM standards.

Nyloplast offers fittings in a variety of sizes. They are available in 4? up to 30? and include several varieties. These products are made from rigid PVC to allow for the long lifespan of each fitting. The products available include downspouts, cleanouts, couplers, end caps, elbows, adapters, wyes, tees, tee-wyes, SCH-40 adapters, sanded manhole adapters, SWR adapters, and increasers.

Nyloplast has designed PVC fittings that can easily adapt and connect to several types of pipe. These pipes include PVC SDR-35, SDR 26, ribbed and corrugated PVC, corrugated polyethylene, IPS Schedule 40 and 80, along with C-900 and C-950. The adaptability of these fittings allow for connection to dissimilar pipes and can easily be used in an abundance of applications. With all of the options available, customers are sure to find just what they need for each project.

For more information on the products, or to reach out to their customer support team for expert advice, visit their website at nyloplsast-us.com.

About Nyloplast

Nyloplast is on a mission to provide the best PVC fitting products on the market today by offering customers cost-effective, innovative, smart designs to last up to 100 years of use. Nyloplast prides themselves in offering support from experts to their clients in the hopes of assisting them with all aspects of the projects they take on.

Nyloplast also works with a team of ADS field representatives to assist their clients during any part of their project and offer support for all aspects, including planning and choosing the right products.
