

Pain Management & Opioid Use Disorder Recovery Clinics Now Serving North Carolina

March 06, 2017

March 06, 2017 - PRESSADVANTAGE -

My Restoration Clinic, based in Greensboro, North Carolina, has announced that they are now accepting new patients at their Greensboro and Murphy locations. The clinic offers pain management as well as opioid use disorder recovery.

Charles Plummer MD, states, "Restoration of Greensboro is proud to offer opioid use disorder recovery and Restoration of Murphy is proud to offer chronic pain management. Both locations are proud to offer assistance to North Carolina and want to let residents know that both locations are now accepting new patients. You can call either location for more information about services and payment options."

The clinic's Greensboro NC location offers medication assisted treatment for opioid dependency through counseling and Suboxone and Zubsolv, a medication used by medical facilities to help with addiction to opioids. The clinic states that their whole patient approach to wellness has been very successful in the past and says that they consistently assist patients with their dependency, enabling them to overcome addiction and lead a healthier and happier life.

"We recognize that patients need more than one approach to their treatment," Dr. Plummer says. "Our clinic in Murphy, NC, offers a multidisciplinary approach to treating chronic pain which includes certain effective medications as well as counseling and physical therapy."

The clinic's Murphy NC location specializes in chronic pain. Dr. Plummer states that those suffering from chronic pain often need medical treatment as well as counseling to help them overcome the turmoil of living with pain on a daily basis.

Dr. Plummer states that there are currently more than 100 million patients who suffer from some form of chronic pain and states that this pain can cause detrimental changes in the patient's lifestyle and daily life. He states that the treatment used in the Murphy location has been proven to be effective and urges those with chronic pain to contact the clinic to learn more.

More than 80 percent of patients who abuse prescribed pain killers and who have attempted to overcome those addictions on their own, often find themselves relapsing and in need of further treatment. Dr. Plummer states that treatment that uses a combination of medication and counseling has proven to be much more effective than many other forms of dealing with opioid addiction.

Those interested in learning more about the services offered at either clinic location can visit My Restoration Clinic online.
