

Marrazzo Landscaping Expands Services To Newton Pennsylvania

February 28, 2017

February 28, 2017 - PRESSADVANTAGE -

Marrazzo Landscaping offers expanded services to customers in the Newton Pennsylvania area. The services available are far beyond attractive lawns and a few plantings.

Newtown PA: The Bucks County landscaping firm and Joe Marrazzo are pleased to announce that they have expanded their service area to include Newton Pennsylvania. The services described on Marrazzo's website include lawns and planting design and care. The company experts can also provide assistance in helping homeowners find ways to enjoy outdoor living spaces more conveniently. The ideas and suggestions offered by the professionals can help the yard and garden become a living room, family room or outdoor kitchen.

Irrespective of the season or the purpose of the room, the team has innovative and attractive ways to add extra living space, outdoor entertaining, relaxing, enjoying scenic views or waterfront access. Both design and building skills are available from the experts at ML. The projects begin with a consultation with the homeowners in order to identify the key elements which he or she wants to put into place.

Whether the project is simple or elaborate, each project begins with a well-planned design. The designers manage every aspect of the project from conception through installation. They oversee the work of foremen, masons and craftsmen. The portfolio of projects includes outdoor living rooms, fireplaces and fire pits and outdoor kitchens. Masonry and concrete projects are also planned and implemented with the knowledge and experience of the skilled team.

Many of the completed projects are featured in the Idea Book which is included on the website. The aesthetic appeal ranges from simple and streamlined functional areas, to fully equipped outdoor entertaining spaces. The projects include a wide range of landscaping and hardscaping components. Expanding the usability of the space through the multiple seasons is done through transforming the ideas of the homeowners and designers into beautiful and functional living areas. The projects are done by professional designers and the work is accomplished in each case by skilled and experienced craftsmen.
