DDCL Roofing & Maintenance Now Has a Dedicated Roof Repair Leduc Webpage

November 05, 2019

November 05, 2019 -

For many years now DDCL has been providing quality roofing and maintenance services to those in the Edmonton, Alberta area. As the word of mouth about the company has spread so has its service territory. Because of this, they started offering their quality roofing and maintenance services to those in Edmonton satellite cities such as Nisku and Leduc. As a matter of fact, their specialized roofing and maintenance services have become so popular in Leduc, the company has decided to dedicate a service page on their website to that area.

Company representative Daniel Foulkes tells why they decided to do this, ?It?s pretty much a no-brainer that when you start getting many requests for your services in an area that you don?t go to that you should explore expanding into that area. That?s exactly what we did with Leduc and we couldn?t be happier about it because it now forms one of our biggest customer bases. To show those in Leduc how appreciative we are for this and to let them better know the types of services that we offer there, we decided it was time to dedicate a service page to that city on our website.?

Foulkes went on to add that all the services that they make available to those in Edmonton can also be taken

advantage of by those in Leduc. This includes any type of residential or commercial Leduc roofing services. Customers in the area like the value for the money they get whenever DDCL puts their over 15 years of roof repair experience to work for them. It does not matter whether someone needs a sloped or flat roof repair either. The experienced crews at DDCL Roofing & Maintenance easily handle repairs to each of these styles of roofs.

The Leduc service page also points out the many different types of roof coverings that the company offers to residential and commercial customers with sloped roofs. Working with asphalt shingles is one of DDCL?s bread and butter services. They are experts when it comes to putting down all types of asphalt shingles. The company even offers highly decorative architectural shingles. These specialty shingles mimic the looks of more expensive roof coverings such as slate and clay tile for a fraction of the cost. Other sloped roof covering options that DDCL offers include cedar shake shingles and clay or slate tiles. Their highly decorative and durable metal roofing panels are also becoming a popular choice among their Leduc customers.

Foulkes mentioned that they offer several different types of reliable flat roof coverings also. This was done so they can take care of the roofing needs of any commercial customer in the area that contacts them. The EPDM, TPO, and PVC flat roof coverings that they offer will do a great job of making any flat roof completely watertight once they are applied. DDCL?s commercial roofing crews are well-trained and experienced when it comes to installing each of these specialty flat roof coverings.

The new dedicated Leduc service page also talks about how the company is very proficient when it comes to remodeling bathrooms and doing all types of residential maintenance services.

As a little something extra for their Leduc customers, the company has even included on the service page two theories about how the city originally got its name. Both theories speculate that the city was named after a certain Father Hippolyte Leduc. He was said to be an important part of the colony there before Leduc became an official government settlement.

Foulkes also talked about how DDCL goes to great efforts to make sure it leaves every customer satisfied with the remodeling, maintenance, and roofing services that they provide for them. Seen here at this link is a press release that discusses a recent review that gave the company high marks on their roof repair Leduc services.

For those in the Leduc or Edmonton areas that want to know more about DDCL Roofing & Maintenance, they can simply refer to their website and go to the dedicated service page for each city.
