Hornsby Electric Expands To North Shore & Hills District In Sydney

November 26, 2019

November 26, 2019 -
Hornsby Electric, based in Mount Colah, New South Wales, Australia, has announced that they have been expanding into the North Shore and Hills District in Sydney. They have a team of North Shore electricians capable of servicing homes and businesses in the area. These are professional and fully licensed electricians who can deliver fast and reliable service. They can provide all kinds of general electrical services and Level 2 electrical work for homes, businesses, and strata managers in the North Shore and Hills District and neighbouring areas. More about their services can be found at hornsbyelectric.com.au.

David Masters, Director at Hornsby Electric, says, ?We?re excited to announce our expansion into the North Shore and Hills District. Our dedicated office staff are ready to answer your call and assist you straight away. We promise a smooth, fast and stress-free experience. And all our work is covered by our 100% lifetime guarantee so you have absolute peace of mind. It?s no wonder over 80% of our work is from repeat customers.?

For their residential services, Hornsby Electric offers various kinds of electrical services. These include electrical fault finding and repairs; energy efficient LED lighting; power points installations; electrical safety; rewiring; switchboard upgrades; rewiring; electrical safety and protection; alarms; phone and data cabling; sub mains and circuits; hot water electrical repairs; ceiling and exhaust fans; outdoor lighting; and free home safety checks. They guarantee that their certified electricians will arrive promptly and make sure that the job is done properly and efficiently. They also provide a free home safety inspection service on every job.

The certified electricians from Hornsby Electric can also provide commercial electrical services. These include testing and tagging; electrical fault finding and repairs; lighting fit-outs with energy saving LEDs; phone and data cabling; new premises electrical fit outs; hot water repairs; electrical safety and protection; switchboard upgrades; rewiring; smoke alarms and detectors; and powerpoint installations. For more information about their services, people can stay up to date with their services at

https://sydneyelectrician.business.site/.

Hornsby Electric is also a Level 2 Authorised Service Provider (ASP). This allows them to repair network services from the street to the home or building, including power pole installation, underground/ overhead services, disconnect/ reconnect metering, and solar metering. For power poles, their work covers various aspects such as: supply of power to new premises through overhead or underground systems; provision of temporary power supply, builders poles and live work; provision of power upgrades, disconnects/reconnects, relocation of switchboards and/or mains, and upgrading of metering requirements; and galvanised and timber.

Disconnect/reconnect and metering services include metering removal; installation of metering; and new homes, existing and demolition. They also hire out cherry pickers at affordable prices. They also install overhead services using their cherry pickers. And they also install solar meters and underground services.

The certified electricians from Hornsby Electric can also provide strata maintenance services for property managers. Their property services include electrical fault finding and repairs; energy-efficient LED lighting; power point installations; switchboard upgrades; electrical safety switches and protection; electrical safety advice; sub-mains and circuits; smoke alarms/detectors; rewiring; ceiling and exhaust fans; phone and data cabling including NBN; 24/7 after hours service; free property safety checks; Level 2 ASP with Ausgrid and Endeavour Energy; outdoor lighting; and electric hot water systems.

They also provide rewiring services for homes. They suggest that homeowners and property owners have their wiring reviewed by one of the qualified electricians from Hornsby Electric. Poor wiring is a hazard for the family as it can cause house fires. It may also damage expensive electrical appliances. Thus, it is more cost effective to have the wiring checked and rewired if needed.

Those who would like to know more about the services provided by Hornsby Electric can visit their website, or contact them on the phone or through email. It should be noted that their office hours are from Monday to Friday, from 9:00 am to 5:00 pm. However, their emergency electricians are available 24 hours a day.
