

In Demand Hair Jewelry By Triple E Fashion Accessories Now Available On Amazon

June 13, 2015

June 13, 2015 - PRESSADVANTAGE -

Triple E Holdings, a business based in Wellington, FL is proud to announce that they have released a new line of crystal hair accessories on Amazon. They will be operating under the brand name "Triple E Fashion Accessories". They currently offer two different accessories and their stock will expand significantly soon following this limited release.

"We are very excited about entering this new category in the retail sector", says Bill Noble from Triple E Holdings. "We look forward to expanding our product line as well."

One of the products they currently have on offer is the crystal banana hair clip, which comes with two matching small alligator clips. These smaller acrylic hair clips are designed to accentuate the larger banana hair clip, although they can also be worn individually. Presented with soft rose crystals, these will look great in anyone's hair, from a little girl who wants to dress up to a bride on her wedding day.

The second item they have on offer are the crystal bobby pins. These are truly luxurious and allow anyone to accentuate a hairstyle and turn it into a thing of exquisite beauty. These clips come with blue gems, which

sparkle in different types of light, giving them the look of expensive diamonds.

The hair clips are also suitable as gifts. They are highly affordable while being of excellent quality and they look stunning. If someone is looking for something to give as a gift to a woman who loves her style, or to any young girl, these products are guaranteed to be a success.

"We are committed to delivery excellent quality products but keeping prices low", adds Bill Noble. "We want to help every woman look her very best. A hairstyle is, for good reason, known as someone's crowning glory and psychology has shown us just how much other people judge us by the look of our hair. With our clips and accessories, any woman is able to turn her crowning glory into something beautiful and unique."

As they are individual clips and pins, these accessories also offer amazing versatility. They can be used to hold hair away from the face, to pin it up in the neck or to accentuate pony tails, plats or buns. They are made from strong materials that won't snag and destroy the hair, while at the same time staying firmly in place so that they don't slip back out.

While the clips are made from metal and contain a number of different gems, they don't feel heavy when place in hair either. Rather, they are highly comfortable and someone who wears them will quickly forget they are there at all. The accessories truly stand out from the crowd.
