Plumbers Edmonton Introduces New Blog Site

January 29, 2020

January 29, 2020 -
Plumbers Edmonton, a division of Capital Plumbing & Heating and based in Edmonton, Alberta, Canada, has announced that they have recently launched a new blog site. This blog is designed to provide helpful information to homeowners and other property owners regarding plumbing and HVAC problems, and their possible solutions. For instance, one of their latest blog posts discusses how to troubleshoot a gas furnace. Another article explains how to fix a leak or crack in a ceramic pipe.

Lief Simons, President and owner of Plumbers Edmonton, says, ?We provide both emergency repairs and routine maintenance service. We can assist you with a faulty water heater, frozen pipes, dripping faucets, boiler repairs, clogged pipes, low water pressure, sewer backups and leaking toilets. We completely understand that plumbing problems don?t always take place during regular business hours. That is why we provide 24/7 emergency services for those emergencies that occur after-hours.?

With regards to plumbing, Plumbers Edmonton is able to deliver repairs, mitigation, and restoration solutions to the insurance industry. They have created a network of suppliers from various kinds of trade who are able to help in getting their customers up and running as quickly as possible. Thus, they eliminate the hassle out of the repair and restoration work that is required by the insurance company and their clients, while closely monitoring expenses. They also keep track of the performance of their contractors. They can provide their

clients with a comprehensive suite of solutions, from an early restoration audit to complete project management. In addition, they can also provide such services independently, including one off work such as roof checks, leak checks, asbestos work, and subsidence work.

The plumbing Edmonton service team of Plumbers Edmonton is made up of well trained, qualified, and experienced plumbers. The company also continually offers opportunities for training and upskilling to make sure that employees are kept up-to-date with current trends, safe work practices, innovations, including hydro jetting, Legionella control in warm water systems, safe working at heights, backflow testing, thermostatic mixing valve servicing, confined space entry, restricted electrical, traffic management, and more. And for the peace of mind of homeowners and property owners, all of their plumbers have an updated federal police clearance.

They can offer the solution to various plumbing and drain cleaning issues. These include problems with bath tubs/ showers, faucets, drains, sinks, toilets/ urinals, sump pumps, sewage ejectors, remodelling, utilities, water heaters, water lines, video sewer inspection, jetting of sewer lines, and faucet installation/ repair.

With regards to toilet installation or repair, they are able to service all toilets, including commercial flush valves. This is important because toilets that leak water internally can easily double water expenses. Thus, the plumbing professionals at Plumbers Edmonton will ensure that they repair the toilet to stop the leak and boost the flush.

Another specialty of Plumbers Edmonton is the installation of water heaters. They usually install tankless water heaters, which is the current trend because such water heaters can provide longer lasting hot water. Water heating makes up the second biggest energy consumption of energy in the home. They install ENERGY STAR® rated water heaters to ensure that the water heater is highly efficient and consumes less energy, while delivering the same or even better performance in comparison to similar products.

Lief Simons points out that there are a number of things that make Plumbers Edmonton stand out among other similar companies. These include the fact that customers will always be answered by a real, life person, even when they call after-hours. Also, the members of the crew who show up at the home of the customer have all been assured to have undergone a full background check. And customers will be provided with a clear price before the work is started.

Plumbers Edmonton does not only serve Edmonton in Alberta. They also serve other areas in Alberta, including Sherwood Park, Spruce Grove, St. Albert, Beaumont, Stony Plain, Gibbons, Fort Saskatchewan, Bon Accord, Calmar, Morinville, and Devon. Those who are interested in plumbing and HVAC services in

Edmonton can check out the website of Plumbers Edmonton at https://plumbers-edmonton.ca/, or contact them on the telephone, or through email. They are open from Monday to Sunday, 24 hours a day.
