

Playtime Felts Flannel Board Stories And Accessories Hits The Market

June 26, 2015

June 26, 2015 - PRESSADVANTAGE -

Playtime Felts has released their Animal Habitat Flannel Board Stories on the Amazon Marketplace. This bundle is a great and fun story time collection of their most adorable playtime felts flannel board stories. Designed specifically for children, these story boards allow for interactive story telling. Furthermore, they offer a great sensory experience. Playtime Felts hopes parents and childcare facilities alike will give these a try.

"The Animal Habitat flannel board story comes with three scenic play mats", says Adela from Playtime Felts. "It also has 54 adorable images and four versatile habitats. The toys are a great way for educators or parents to introduce the different flora and fauna found around our planet to children and to teach them about some of the most amazing animals in the world."

The felt stories are all designed to be soft and durable, making them suitable for children of all ages. Research has also shown that these types of products are very beneficial for children with some sort of sensory deprivation, as well as for children who score highly on the autistic spectrum. It is also a great method of making learning more fun and of engaging children in the story they are listening to.

Besides the Animal Habitat, Playtime Felts also offers a range of other felt board sets. These include the community workers set, the lower and upper case alphabet, Goldilocks and the Three Bears, fun shapes, ladybug life cycle, playtime farm babies, Humpty Dumpty, Noah's Ark, ocean creatures, Garden of Eden, Itsy Bitsy Spider and many more.

Previous sets have proven to be hugely popular and Playtime Felts hopes that the new set will be equally popular. "When I received my order, I was excited to find that the images were bright and colorful", says O.T. Judd. "This is an uncut set which didn't bother me to much seeing that it is on high quality felt like advertised. I've purchase other animal sets for my classroom, which were precut, and their quality didn't compare to Playtime Felts. So looking forward to introducing each set to my students."

The new felt board sets includes four habitats, being the ocean, African, desert and freshwater marsh. It also

includes a range of creatures that could be found in these areas, such as the elephant, lobster, cactus and marsh fly. Children are able to play with the habitats and creatures in a variety of different ways, allowing them to learn as they go along. Indeed, they do not even have to be combined with any specific story to be enjoyed. Learning through play is known to be the best way of teaching children, particularly the very young ones, and these sets aim to achieve this.
