

New Online Store Offers Top Quality US E-Cig Supplies and E-Liquids

April 03, 2017

April 03, 2017 - PRESSADVANTAGE -

Vaporlane offers an inventory of top quality vaping supplies and liquids from US sources. The online store only stocks and sells products from popular brands.

Gold Coast QLD: Vaporlane and Octavian Vogel are pleased to announce the launch of their website and business offering the latest in vaping products and supplies. The online store stocks and sells only the best products and accessories from popular brands such as Aspire, JoyeTech, Kanger, Eleaf, Innokin and Smoke. Other products available from the inventory include electronic cigarettes, vape mods, e-liquids, vape pens, vaporizer starter kits and accessories. All e-juice and e-liquid products are USA made.

All of the products come in a range of flavours. The online business continues to add new E-Cigarette, tanks, vape mods and accessory products. Vape pens are also known as e-cigarettes. Other terms include electronic cigarettes and e-cigs. All the labels are used to describe an electronic device which creates vapor from flavoured e-juice or e-liquid. Most people who turn to the devices are ex-smokers, people who have tried to stop smoking and have failed. Vaping is one of the most successful ways for smokers to kick the habit.

A starter kit includes a vape pen, a charger and e-liquid. The latest products are very advanced. They have improved battery power, tanks that can contain more liquid and produce more vapour. Some of the devices have wattage and temperature controls. They come in many different shapes and sizes. Many resemble traditional tobacco cigarettes. There is a variety of e-liquid flavours which suit any taste.

Vapor cigs offer several benefits over traditional tobacco products. These include no tar, no ash, no bad odours, no carbon monoxide, no lingering odours in clothing and no stained teeth. Tobacco cigarettes are dangerous, thanks to approximately 7000 chemicals produced by cigarettes. A recent UK research study suggests that vape pens are 96 percent safer than tobacco cigarettes. The website is user-friendly and is secure for customers to include sensitive information when ordering.
