White Label CBD Oil Manufacturer Launches New Organic Facial Cream

September 29, 2020

September 29, 2020 - PRESSADVANTAGE -

Alpha Therapeutics LLC, a White Label CBD oil manufacturer, is pleased to announce the launch of their new facial cream, an organic cannabigerol (CBG) product. CBG may not be as popular as CBD oil, but a growing field of study suggests that it may be able to deliver as many benefits as those provided by CBD oil. Just like CBD, CBG is a cannabinoid, which is a naturally occurring compound found in hemp and cannabis plants. CBG is considered by some as the ?mother of cannabinoids? because it is believed that many cannabinoids begin as a form of CBG.

The newly launched product is the 2:1 CBG/CBD Premium Facial Cream. This particular organic product is formulated using a wide variety of beneficial ingredients, including CBG oils, CBD oils, tonifying dimethylethanolamine (DMAE), CoQ10 and moisture-boosting hyaluronic acid. This particular product may help in toning, hydrating, softening and revitalizing the user?s skin. It is produced in a base of organic aloe vera and delicate rose distillate. The facial cream contains 500 mg of CBD, 250 mg of CBG, hyaluronic acid, alpha lipoic acid, vitamin C, vitamin A, pro-vitamin B5, vitamin B3 and vegan DMAE.

Also a vegan product, its complete list of ingredients includes CBD, CBG, rose flower water, emulsifying wax,

glycerin, organic aloe leaf juice, meadowfoam seed oil, vitamin E, DMAE bitartrate, vitamin C, carrot seed oil, sunflower seed oil, coenzyme q10, provitamin A, hyaluronic acid, alpha lipoic acid, provitamin B5, vitamin a palmitate and vitamin B3. The product also contains ingredients such as organic bilberry fruit extract, organic sugar maple extract, organic sugar cane extract, organic lemon peel extract, organic cranberry fruit extract, organic orange peel extract, castor oil, lecithin, organic alcohol, phenoxyethanol, tetrasodium glutamate diacetate, and xanthan gum. Learn more here: CBG facial cream.

Cannabinoids, like THC and CBD, are naturally synthesized from CBG. This is the reason for there being less CBG in the more mature cannabis or hemp plants. The amount of CBG in the cannabis or hemp plant decreases as the plant matures because it is being synthesized over time to produce the other types of cannabinoids. CBG is becoming popular because of the fact that it is non-psychoactive, which means that people may be able to use its therapeutic benefits without the effects of THC, which alter the user?s state of mind.

According to the research being conducted on CBG oil, there are various potential therapeutic benefits. These include pain relief; anti-anxiety and antidepressant properties; ability to function as natural muscle relaxant; antimicrobial, antifungal, and antibacterial properties; neuroprotective effect; the fact that it may assist in managing bladder dysfunction; anti-tumor effects; the fact that it may help strengthen the bones; the possibility that it may help in managing psoriasis; the fact that it may help soothe inflammatory bowel disease; and the fact that it may help in the treatment of glaucoma.

The company points out that it is important to realize that CBD and CBG are quite similar. They are both cannabinoids and are naturally occurring compounds that can be derived from the hemp or cannabis plant. CBD and CBG both interact with the endocannabinoid system of the human body and thus have an impact on the body by interacting with that system. Both CBD and CBG are non-psychoactive and both may have several benefits. The company is also willing to custom-formulate products for individual customers, based on exactly what kind of CBD product they want.

Alpha Therapeutics LLC has also launched another product, the 2:1 CBG/CBD pain stick with 2000 mg of CBD and 1000 mg of CBG. It is to be applied topically at the site of the pain for temporary relief muscle pain due to strains and joint discomfort. It is assured to be THC-free, and it is provided with a no mess, no rub applicator. Its organic content is estimated to be 95%, and its ingredients include CBD, CBG, organic coconut oil, organic yellow beeswax, eucalyptus, camphor, organic peppermint, organic cocoa butter, Arnica montana and organic menthol.

Those who would like to know more about the organic premium facial cream, CBG oil pain stick and other products from Alpha Therapeutics may visit their website or contact them via telephone or email. More information is also available on their official website and other online resources. Similarly, customers may

reach out to Geoff Dada of Alpha Therapeutics LLC to follow up on any further inquiries.
