

Commercial Roof Management Program Launched By Fort Worth Business

June 15, 2015

June 15, 2015 - PRESSADVANTAGE -

Commercial Roofing Team, a roofing business in Fort Worth, TX, has launched their commercial roof management program for building owners in Fort Worth. Their goal is to help manage their roofing assets. This will help to prevent future issues, thereby also minimizing the costs that the building owner will experience. It is hoped that many building owners will become interested in this service.

"Too many people forget about the importance of their roof, possibly because they simply cannot see it", says Kevin Daskocil from the Commercial Roofing Team - Stephenville Team. "However, when something does go wrong with the roof, the costs can be significant. Not only is roof repair very expensive, but a broken roof can also cause damage to whatever is contained inside the building. Our program hopes to avoid these types of issues from happening."

The roof protection plan is a comprehensive protection plan. It meets the vision of the business itself, which can be reviewed on <http://commercialroofingteam.com/about-us/>. Essentially, it offers customers a semi-annual roof inspection. After this inspection, they will receive a full report that highlights any required repairs, as well as any advice in terms of preventative maintenance. This report is fully documented with photographic evidence. The package also includes an annual drone flyover. Furthermore, it allows people access to the 24/7 roof emergency number. The entire package costs just \$385 per year.

"We want to be the company that building owners can trust and that is what we are working towards", adds Kevin Daskocil. "When it comes to roofing needs, we are the company to go to. We work with anybody, regardless of the size of their roof and will offer them the highest quality of service."

Essentially, the company understands that worrying about the roof is something most people simply do not have the time and energy for and it is an often forgotten part of a building. However, Commercial Roofing Team is able to take this important responsibility out of the hands of the building owners. They will ensure the roof is maintained properly and, if something does need doing, that it is completed in a professional manner without any issues or surprises.

Indeed, other roofing companies are looking at Commercial Roofing Team as an example of best practice. They are quickly becoming the best known company in the Fort Worth area and beyond. Their levels of customer satisfaction are incredibly high, and anyone is encouraged to contact them to discuss their needs using the contact form on their website, found on <http://commercialroofingteam.com/contact-us/>. They promise to respond very quickly and to be attentive to the needs of the customer, regardless of what their roofing issue may be, and regardless of the type of building they have.
