

# Go Back To 30 With Botox In Greenville, SC

*December 14, 2020*

December 14, 2020 -
Back to 30, a medical spa based in Greenville, South Carolina, is pleased to offer their revitalizing services to the local community. The clinic would like to recommend their Botox treatments in particular to those who wish to rejuvenate their appearance. The medical spa also services several other communities in the SC region, including Simpsonville and Boiling Springs.

The medical spa is in the top 1% nationally of Allergan? accounts, the producer of Botox Cosmetic. This prestigious award is only given to the top 1 percent of all Botox and filler providers in the country. To quote the website, the spa also offers, ?chances for you to win a free BOTOX® Cosmetic treatment.? They are also widely recognized for their skilled professionals and their dedication to customer?s satisfaction. Those living in the Greenville region can be assured that they will be in the best of hands when undergoing a Botox treatment at this clinic.

The Botox treatment can target signs of aging in various areas of a person?s face. The cosmetic contains botulinum toxin, a protein that has the ability to temporarily immobilize facial muscles that cause lines and wrinkles to develop. The treatment, which was approved by the FDA in the late 1980s, is used to treat a wide range of medical concerns, as well as the cosmetic effects of aging. The injectable treatment functions by blocking the signal from the nerves to the muscles. Since the injected muscle can no longer tighten

completely, the wrinkles in the area relax, creating a softer and more youthful look. Those living in the Greenville region may receive this treatment through the medical spa, or visit their Facebook page for additional information before they make any decisions.

Those wondering if Botox is for them will be pleased to learn that the spa is always keen to share which common areas benefit most from the treatment. Botox is used to address crow?s feet, frown lines, forehead creases, lines around the mouth and chin and sagging or drooping eyebrows. However, the spa recommends that the best way to find out if one can benefit from this treatment is to schedule an appointment with one of their medical practitioners. Those living in Greenville may visit their local branch for a consultation.

Many people often mention a fear of needles. Back to 30 is pleased to explain that their professionals use small needles to inject the treatment, and many patients notice little to no discomfort during the procedure. The spa also offers the option of numbing the treatment area with an anesthetic or a cold pack to ensure their client?s comfort. After the treatment, a person may experience some minor redness, pain, or bruising shortly after the injections, all of which will decrease within a few days.

In a client testimonial on the official website, Christin M. states that it was, ?The least painful Botox treatment I have ever had. I was extremely impressed with everyone in your office today. She took the time to listen to what I thought I needed, and then she gave me her honest opinion, took ?before? pictures and then made all these marks where she suggested I get injections. It was the least painful Botox treatment I have ever had! Loved, loved, loved everyone there and just wanted to say thank you!?

A patient can return to work and other normal daily activities immediately following the procedure. However, the spa advises that one should not lay down for at least an hour after the procedure or rub the treated area for at least 12 hours. Putting too much pressure on the treatment site can affect the final result. Strenuous exercise is also not recommended within the first 24 hours after the treatment. Patients will begin to see a visible difference in the treated area within the first two days of treatment, but it may take up to two weeks to see the full result. The spa notes that regular treatments will be necessary to maintain the final result. Learn more on the clinic?s GMB listing.

The medical spa offers a wide range of other treatments and procedures, including laser hair removal, microblading, dermaplaning facials and DermaSweeps. The spa also offers options that include weight loss programs, CoolSculpting and vitamin injections. All procedures and treatments are carried out to the highest standard by trained professionals. This ensures that all clients receive the best care and treatments which are the most suitable for them.

One may visit the official website if interested in the Botox treatment or other procedures offered by the medical spa. For further inquiries, one may call or email Back to 30 directly as well.
