Company Specializing in Appliance Repair in Elk Grove CA Launches New Website

December 24, 2020

December 24, 2020 - PRESSADVANTAGE -

Appliance Repair Pros Elk Grove is pleased to announce the launch of their new website. The company has long been known for its customer service and the new and improved website will only help add to that reputation. Now their customers will have an easier time getting information on the services that the company offers, learning why they are the right company to hire, and finding out the many different ways there is to contact them.

The company representative says, ?We are a business that constantly strives to be as progressive as possible in every aspect of our business. As a result of that, a few of us here brought up the fact that we felt our website was getting a little behind the times as it had not been updated in several years. We then decided to get together with our web developer and build a totally new website with a focus on it being user friendly and providing information on our services in a more concise and direct manner. Our staff could not be more pleased with the way that the new website turned out and the positive feedback from our long-time customers shows that they like the results too. We promise to continue to be proactive when it comes to taking steps that will make us one of the most customer-friendly businesses in the Elk Grove, California area.?

According to the company spokesperson, their new website can be seen here at https://www.appliancerepairproselkgrove.com. Once a customer arrives at the website, they will immediately see that the homepage is pleasantly laid out as it's not overcrowded with photos and text. Even the background is done in soft white and light blue so it's not overbearing. Those who have used their old website will also notice that the user interface on the new website is much improved and the drop-down menu has also been simplified. The company spokesperson added that another feature of the newly launched website that is a big improvement over the old one is the way it better describes their services. Each of the services that they offer such as refrigerator, microwave, freezer, oven, dishwasher, and washer and dryer repair feature a point and click option that takes the user to a dedicated page that better describes that service. These pages describe common problems that the techs at Appliance Repair Pros Elk Grove often come across with a particular appliance and what typically causes the problem. Each of these service description pages also features a quote request form which the customer can fill out to get a rough idea of what their appliance repair may cost.

Appliance Repair Pros is not only getting rave on their new website but their customers also rate their services very highly. Gene Weikel wrote in his 5-star customer review, ?I just moved to the area and my freezer must have been damaged in the move. Appliance repair pros got it fixed for me. I will definitely be calling them next time I need their services.? Rosario Jacobs also wrote a 5-star review that stated, ?My dryer had stopped working so I gave these guys a call, they came out that same day and even had the parts to fix it. Lifesaver, thank you!? Both of these glowing reviews were taken from the company?s Google Maps Business Listing. Additional positive reviews on the company?s services can also be seen on their Facebook and Yelp.com pages.

The company spokesperson went on to say that they are a local appliance repair company that offers their services Monday through Friday from 9am to 5pm. Their skilled and experienced technicians take much pride in their work and the company is also known for charging reasonable prices for their services. He mentioned that they offer their appliance repair services throughout the Elk Grove, CA area including the communities of Laguna, Sheldon, Vineyard, Franklin, and Florin. Those who wish to get more information on their appliance repair services have the option of referring to the newly launched website or contacting a company representative by phone.
