

Pro Pad Inc. Says Medical Polymer (Gel Seat Pads) Technology Provides More Comfort To Motorcycle Riders' Bottoms On Long Trips

June 26, 2015

June 26, 2015 - PRESSADVANTAGE -

Mike Enzwiler, President of Pro Pad Inc., announced that the Medical Polymer (Gel) Technology, which their motorcycle seat pads contain, will help motorcycle riders' bottoms feel more comfortable on long trips. He said that a common problem many riders experience on long road trips is "rearendis numbicitis", which is when that area goes numb and causes discomfort when sat on for a good amount of time.

The president of Pro Pad Inc. added that the reason why that area goes numb is due to the pressure points on their rear end. The medical polymer gel helps to dissipate weight over a greater area, he explains, and the result is that pressure points are reduced and blood flow improves.

The Tech series pads, which are listed on the company's online store and are shown at <http://www.thepropad.com/tech-series-gel-seat-pads/>, contain 3-D mesh fabric, so another benefit that most riders will be getting from these pads is increased airflow in that area, and it also helps to reduce hotspots. Mike Enzwiler also made the following statement,

"In the war against "numb butt" and sweat, the Tech Series top pad is one of our latest weapons. Need help selecting the correct size? The Pro Pad Fitment Chart should help."

The company encourages all interested parties to check out the range of motorcycle seat pads listed on their site; especially the Tech series gel seat pads. In this range, customers have the choice between the Large Tech Series Gel Pro Pad, Medium Tech Series Gel Pro Pad, Small Tech Series Gel Pro Pad, SuprCruzer Tech Series Gel Pro Pad and Touring Tech Series Gel Pro Pad.

Mike also made the following statement in how they dealt with the uncomfortable numb feeling that motorcyclists get,

"Back in 1999, we started with one goal: Stop "Rearenditis Numbicitis". Our Harley seats were killing us and we knew there had to be a better way. The options of seat pads at the time just didn't cut it for us, so we started on our own path to riding comfort. From the beginning, it's been a family business with everyone chipping in. Mom did the sewing, Dad did the books and I did the... well whatever was left. Our goal then was, as it is now, to provide a better riding experience via a high quality, super comfortable seat pad. We chose a medical grade polymer gel because of how effective it was in hospitals and in wheelchairs. Our covers were chosen for their durability, ridability, style and comfort. Put those together, along with an easy to use strapping system, and you have the Pro Pad Top Pad.

All of the motorcycle seat pads, which can be seen at <http://www.thepropad.com/motorcycle-seat-pads/>, come with a warranty, and the company ensured all customers that they can also expect an excellent shopping experience from Pro Pad. For those who have further questions, the company invites them to contact them by telephone or email. Pro Pad inc. also has a dedicated FAQs page to help those that have similar questions to those commonly asked by customers in the past.
