GraceKennedy is a business in Kingston, Jamaica, that strives to provide the American market with an authentic taste of the Caribbean island nation. They are proud to announce that Grace coconut milk powder, which is available in a packs of three on the Amazon marketplace, has been awarded 'Amazon's Choice' by Amazon themselves. This comes after the product has also received in excess of 80 positive reviews.

A representative from GraceKennedy says: "We want to provide people with a real taste of Jamaica and coconut milk powder is an essential ingredient in most Jamaican recipes. We are very happy to see that so many people have been raving about our pack of three such that it has become an Amazon's choice item."

The product comes in sachets of dried coconut milk. To make coconut milk, people take three quarters of a cup of warm water and half a cup of coconut milk powder. When properly mixed, this creates one cup of coconut milk, to be used in their cooking.

"Because the product is provided as a dried coconut milk, it keeps almost forever," adds the representative from GraceKennedy. "And because it comes in a pack of three, it means people can purchase multiple packs and know that they will keep. That said, once you have tried our coconut powder once, you'll probably start adding it to virtually all your recipes. Luckily, we also sell it in packs of 12."

Those who have tried the product have been full of praise about the coconut milk and its flavor. They also hail the fact that it truly tastes as it did when they had meals in Jamaica. "This is great stuff. I try to stay away from dairy for ethical reasons - and was pre-packing some ziplock bags for daily protein/supplement drinks for a trip to India I leave for next week - and so put a couple spoon fulls of this coconut milk powder in each pouch to use in my shaker while on the road. I just made one to test it out and it tastes amazing - good stuff - it mixed right in better than I expected....," says an Amazon customer. The dry coconut milk powder can be purchased in packs of three, six or twelve, on the online shipping portal Amazon.
