Clinton Township Roofers Recommend Asphalt Shingles in New Blog Post

July 20, 2021

July 20, 2021 -
Miller's Home Improvement, a Clinton Township, MI-based roofing company, recently published a blog post explaining why asphalt shingles are better than metal roofs. The roofers are committed to making sure their customers' roofs remain in good condition for years to come, and one way in which they do this is through educational blog posts.

There are a number of factors homeowners should take into account when choosing a roof, and Miller?s Home Improvement?s blog post is aimed at helping readers identify what these might be. The Clinton Township roofing company is locally owned and is thus committed to ensuring the community?s roofs remain in great condition.

?You might think we're making metaphors out of thin air, but we genuinely believe that asphalt shingle roofs perform better than metal roofs,? says the roofing company. ?It's easy to see the long-term capabilities of metal roofs because of their durability and galvanized steel's exceptional dependability over time. Truthfully,

any Clinton Township, MI homeowner is crazy to skip out on metal roofing if they have the cash. However, asphalt shingle roofing can deliver the following advantages over metal roofs.?

The first reason why asphalt roofs are superior to metal roofs, according to the Clinton Township roofers, is peace of mind. Metal roofs do not need to be replaced every 30 years, and one can rest assured knowing that they will not need to tear off and replace it three decades down the line. While asphalt shingle roofs do need to be replaced every now and then, they are more reliable once they have been replaced. Metal roofs last longer but property owners cannot always be certain of their condition, which makes asphalt roofs (which are regularly replaced) far more reliable. Asphalt shingle roofs do not corrode either and the shingles can be swiftly replaced whenever they fall off due to inclement weather or any other natural phenomenon.

Asphalt roofs are just as capable of deflecting hail as metal roofs, according to the article. While the lifespan of an asphalt roof is usually shorter than that of a metal roof, it is just as capable of deflecting hail as other materials while also being easy to replace in case of damage. Durability and quality are both important when looking at roofing materials and asphalt offers both in addition to variety. There are countless shapes, colors, and textures to choose from when it comes to asphalt shingles and property owners can be sure to find the color or shape that meets their needs and preferences exactly.

Whatever material is chosen for a roof, it is important to ensure it is installed by a qualified expert. Miller?s Home Improvement has been in the business for over 30 years and has been providing excellent service for every year of those three decades. Their number one goal has always been to exceed the expectations of homeowners when it comes to roofing and they have succeeded on that front, providing affordable, personalized service to a range of customers. The fact that they are a local company means that Miller?s Home Improvement is in a better position to offer personalized service that meets the needs of every individual customer. They know the area and its residents and they understand what the people want and need.

?Eric and his team at Miller's Home Improvement did an exceptional job replacing our entire roof, including a skylight,? says a 5-star Google review. ?We solicited multiple quotes, ultimately choosing Miller's Home Improvement based on others' recommendations. Eric was timely and thorough in communicating before, during, and after the project. Minor issues were professionally discussed and quickly addressed. Cleanup was immaculate on both days of the project.?

Another customer shares, ?I can?t say enough about Miller?s Home Improvement! Extremely professional, trustworthy, detail-oriented, and even affordable (especially for such a tough job)! We highly recommend them if you?re looking to invest in a new roof or even if you need some repairs done right.?
