

iKlips II iOS Flash Drive Now Available In Three Storage Capacities

December 11, 2017

December 11, 2017 - PRESSADVANTAGE -

Taipei City, Taiwan modern electronics business ADAM Elements recently popularized their iKlips storage device for iOS products. When originally released, the device offered 32GB of storage. They have now announced that they have released two iKlips II models, offering 64GB and 128GB of storage. All three are now available in gray and red color.

A spokesperson for ADAM Elements says: "The iKlips II with 32GB storage capacity was our prototype model and it quickly became hugely popular. Hence, we felt confident about releasing it in 64GB and 128GB storage capacities as well. We're happy to see that our customers are already enjoying these greater storage capacities."

The device has been designed to easily clip onto any iOS device, such as iPhone, iPad, or iPod Touch. It is fitted with a USB connector as well, which enables users to quickly and easily transfer their files between their own iOS devices, or even with a PC/Mac. In so doing, they can have all their files securely in one place, which is also highly beneficial for professional purposes.

The spokesperson adds: "It is now quite common for people to have iOS devices and to have to hold professional presentations, only to find that the audio visual technology they have to use is not compatible with iOS. Thanks to the iKlips II, this is no longer a concern. So long as the receiving device has a USB port, which is quite common, the files can be transferred with ease."

Naturally, the iKlips II is also fitted with Touch ID, which means all files contained on it are 100% secured. Furthermore, it is Apple MFi-certified, which means it is made for iOS devices and will always work without causing damage as well. The representative adds: "We focus on making accessories for smart devices that are 100% fit for purpose. All our products are fully certified, meaning that people can use them on their smartphones and other devices with full confidence."

The iKlips II is currently available on amazon.com. People are encouraged to browse through the company's catalog for other similar electronics devices.
