Cruvina, providers of shatterproof plastic glassware, announced today that their set of four Tritan plastic cocktail glasses have a comfort spill-guard rim.

"Yes, that term can sound strange, and some of our customers have asked us what, exactly that means," says Cruvina Co-Founder Erin Moore. "So I am happy to explain. It can happen that drinkware made out of plastic can be made of a lower quality plastic which is thin and flimsy. So the rim of the glass can be sharp and uncomfortable to drink from. This can also result in the drink dribbling down the glass or even the chin. We decided that our customers deserved better, so we designed our tumblers with a high-grade plastic, as well as a comfort spill-guard rim. This means that the rim is comfortable to drink from and does not dribble.?"

Cruvina plastic cocktail glasses are made from Tritan plastic by Eastman. This is a high-quality, food-grade, BPA-free polymer that looks like glass. Though lightweight, the plastic is thick and strong. The glasses have been molded with a rim design that feels comfortable to the mouth and prevents the liquid from dribbling.

The glasses are also designed with anti-tipping technology and are dishwasher-safe. They maintain their crystal clear look after repeated use and washing. The cocktail tumblers have an elegant design that fits comfortably in the hand. The tumblers can be used to hold many different kinds of drinks, such as whiskey, other cocktails, soda, or even juice. And because the tumblers are shatter-proof, they can be used to serve drinks in any setting, indoors and out.

Says Ms. Moore, "Our goal is to provide our customers with plastic drinkware that enhances the drinking experience in all ways. From being cost-effective and safe to being elegant and just plain comfortable and fun to drink from."

A set of four reusable 14-ounce Cruvina cocktail glasses can be purchased on Amazon for \$24.97 and comes with a 30-day money-back guarantee.
