

Ask Dave Taylor Shares Honest Electronic Device Reviews

August 31, 2021

August 31, 2021 -

Youtube channel Ask Dave Taylor is pleased to announce that they are sharing honest and unbiased electronics reviews online. Ask Dave Taylor is a rapidly growing channel that uploads video reviews of various devices, including earbuds, microphones, webcams and so on. They upload videos multiple times a week, so subscribers get a steady supply of reliable information about the latest electronic devices on the market.

Ask Dave Taylor has been on the Youtube platform for more than 13 years. To date, it has amassed more than 9 million total views. This figure continues to grow each day as more and more people tune in to the reliable and entertaining videos on the channel. Some of the most recent videos on the channel are reviews of the Seenda Rechargeable Backlit 4-Device Bluetooth Keyboard, MOVO UM300 USB Desktop Microphone and QUESTYLE M12 Mobile Hi Fi Headphone Amp + DAC.

On Youtube, Ask Dave Taylor?s channel description says, ?Wondering about the best tech gadgets, audio

gear and devices? You can trust Dave's years of consumer electronics industry experience (including being an Innovations Award judge at the Consumer Electronics Show year after year) to help you make the right purchase decision in his honest and entertaining videos. Go ahead, subscribe, there are always interesting new product reviews at Ask Dave Taylor!?

The channel is primarily run by Dave Taylor, who has more than 40 years of experience in the computer industry. He holds a Bachelor?s Degree in Computer Science from the University of California, San Diego. He also has a Master?s in Education from Purdue University as well as a Master?s in Business Administration from University of Baltimore, Merrick School of Business. The combination of experience and academic credentials that he holds makes him uniquely qualified to provide in-depth reviews on the various electronics devices available today.

Taylor wields far more than comprehensive expertise regarding electronics ? he also knows how to share it to other people in a clear and entertaining manner. He has experience teaching both undergrad and graduate classes at the University of Denver. He also speaks regularly at trade and professional conferences. In fact, he has won many awards as a public speaker. Taylor also runs large conferences and has involved himself in virtually every aspect of running such events, including giving keynote talks, arguing on panels and moderating panels. He even participates in online events held through Zoom, Microsoft Meeting and similar tools.

Dave Taylor is also a writer who has written 22 books in addition to thousands of newspaper and magazine articles. He still writes to this day, and he even has a popular monthly column for the Boulder Daily Camera. He also writes forewords and introductions for other people?s books.

Thanks to his experience as a teacher, public speaker and writer, Taylor is able to articulate his thoughts in a clear and engaging manner that leaves his audience both informed and entertained. In addition, he has taken multiple forays into the business world, having created and launched four Internet related startups. The first of these four start ups is the original iteration of The Internet Mall. Although The Internet Mall is now obscure, it once was a part of the dot-com bubble. He has also worked as a due diligence analyst and an entrepreneur in residence with several investment and venture capital firms. He has served (and continues to serve) on the board of various small companies.

Taylor also has his own website, which contains information about himself and the Ask Dave Taylor Youtube channel. It is also home to several posts that answer electronics and technology-related questions that his audience may have. As with the video reviews on the Ask Dave Taylor Youtube channel, these posts are uploaded multiple times a week. He understands that there is so much to know about electronics and technology, and this is why he tries to provide a consistent stream of reliable information. Taylor is assisted by a team that includes Gareth Taylor, Ashley Taylor, Gary Moskoff and several others.

Those looking for a reliable and honest source of electronics reviews and information may check out Ask Dave Taylor on Youtube. They may also contact Dace Taylor directly for business inquiries.
