

Cruvina Shatterproof Plastic Cocktail Glasses Look Like Real Glass

March 28, 2018

March 28, 2018 - PRESSADVANTAGE -

Cruvina, providers of shatterproof plastic glasses, announces that their cocktail glasses look like real glass.

Co-Founder Erin Moore says "Drinking cocktails out of real crystal glasses is a pleasure. But there are times when it is better to drink out of a plastic glass. So one of our goals in developing our line of plastic drinkware is to provide high-quality products. This way you have the aesthetics of real glass along with the safety, economy and convenience of plastic.?"

The Cruvina Cocktail Glass Set consists of four 14-ounce, flat-bottomed cocktail glasses made of Tritan plastic, a high-quality, food-grade, BPA-free polymer made by Eastman. This plastic was specially developed to be scratch-resistant, odor-resistant and shatterproof. The glasses retain their clarity and shine through repeated use and can stand up to being washed in the top rack of the dishwasher. The tumblers have the feel and appearance of real glass.

The glasses are also designed with anti-tipping technology and a comfort spill-guard rim, so the risk of party mishaps or broken glass is reduced. This allows for stress-free entertainment in any setting, from a formal cocktail party to an afternoon picnic in the park. These glasses are lightweight and strong enough to be used by children as well.

Cruvina customers are very pleased with the quality of the glasses. Here is what one had to say:

"These are fantastic! I honestly didn't know what to expect, but they actually look like glass. They came promptly and well packaged. They are super lightweight and indeed shatterproof (test performed by 3 year old). They would be great for parties or poolside drinks."

The Cruvina Cocktail Glass Set is available on Amazon and comes with a 30-day money-back guarantee.
