

Dentist In Northbrook Has More Than 200 Five Star Reviews

September 19, 2018

September 19, 2018 - PRESSADVANTAGE -

Northbrook Dentist Office in Northbrook, IL, has announced with pride that to date, they now have 224 five star reviews. According to the dentist office, these five-star ratings indicate that they have been doing things right in ensuring the satisfaction of patients. Dr. Steven Kacel, the dentist Northbrook residents consider to be a premiere dentist, has several awards and several credentials and memberships that demonstrate his ability to provide quality dental services.

Dr. Kacel says, "I've been serving the dental care needs of people in the Northbrook area for 33 years. This has earned me the reputation of being able to provide quality dental services at a reasonable price. We also strive to help patients with budget constraints by finding a solution for them."

Leonora S., who gave the dentist office five stars, says: "Bonnie cleans my teeth so incredibly well - they literally sparkle when I leave. People always comment on how white my teeth look - that's in no small part due to Bonnies cleaning magic."

Meanwhile, a patient who chose to be anonymous, says: "Dr. Kacel is a fantastic, thorough dentist and I trust

him implicitly. His staff is also friendly and always accommodating. Bonnie does an amazing job cleaning my teeth - they always sparkle when I leave and people always remark on how white they look."

Amanda, who also gave the dentist office five stars, says, "Cindy makes going to the dentist an enjoyable experience. Everyone is very friendly and knowledgeable."

Steven Kacel DDS PC offers various kinds of services, including porcelain veneers, implants, denture and partial dentures, all porcelain crowns and bridges, Invisalign, cosmetic bonding, snoring and sleep apnea treatments, and teeth whitening.

Porcelain veneers are for fixing teeth that are broken, chipped, worn down or discolored. These are usually very thin, customized shells of porcelain that are colored to look just the teeth of the patient. The result of having porcelain veneers is an improvement in the patient's smile.

Dental implants are a relatively new development in dental care. They offer a way to "replace" a missing tooth. These offer the benefits of improved speech, improved appearance, better eating, improved comfort, better oral health, improved self-esteem and self-confidence, and durability.

Northbrook Dentist Office also offers all porcelain crowns and bridges. These are often used to treat weak and decaying teeth, chips and cracks, and missing teeth. They are also the last step to be taken after root canal therapy has been performed.

And, of course, the dentist office also offers full or partial dentures. Partial dentures are a good option for the replacement of teeth that have been lost. These are used when there are still a number of healthy teeth remaining. There are various benefits of using full or partial dentures, such as the fact that they are visually pleasing, restoration of full eating functionality, and health benefits as they support the facial muscles and structures properly.

Northbrook Dentist Office also offers cosmetic bonding, which is used in a wide variety of situations to enhance the functionality and appearance of teeth. The resin material used in cosmetic bonding is durable and matches the look and feel of natural teeth. This can be used for repairing chipped or decayed teeth, whitening discolored teeth, protecting the teeth when gums recede, and changing the size and shape of the teeth.

Meanwhile, the dentist office also offers Invisalign, which is a much better alternative to the traditional braces. With Invisalign, people are able to avoid the disadvantages of metal braces while helping to straighten the teeth, enhance the patient's appearance, and offer comfort to the patient throughout the treatment. Metal braces have the disadvantage of being able to damage teeth or gums when worn over a period of time and

Invisalign helps to avoid such problems.

Dr. Kacel has substantial training with regards to diagnosis, the planning of treatments, and oral rehabilitation. He graduated from the Northwestern University Dental School and has been offering dental care services in Northbrook for more than 33 years. He has received the Professional of the Year Award in Dentistry for 2011, 2012, and 2013. He is a lifetime member of the Strathmore's Who's Who Worldwide list and he has been a dental consultant and attending doctor for the University Health System at Highland Park Hospital for 30 years. He is a member of various professional organizations, including the American Dental Association, Illinois State Dental Association, Academy of General Dentistry, American Academy of Cosmetic Dentistry, American Academy of Implant Dentistry, Academy of Dentistry International, and American Academy of Dental Sleep Medicine.
